

Welcome to your Insights!

Below you will find insights and trends related to your behavior and reported emotions over the course of the study. Please review with your clinician in your next session.

The number at the top of each bar is the average score of an emotion you felt over the course of the study, ranging from 0 (no emotion) to 3 (greatest amount)!

The taller the bar is, the more you felt that emotion over the last few weeks!

Psst: scroll down to see how your actions corresponded with your feelings!

Over the last few weeks...

Happiness

When your movement was less than walking during the daytime, you were more happy.

Also...

1. When you were on calls for less time, you were more happy.
2. When you received fewer phone calls, you were more happy.

Sadness

When you received fewer than 1 call in a day, you were more sad.

Also...

1. When you traveled less, you were more sad.
2. When your minimum movement was more, you were more sad.

Calm

When the total time you spent on any apps was less than 22 minutes, you were less calm.

Also...

1. When you had dimmer light around you, you were less calm.
2. When you spent less time on entertainment apps (apps like TikTok, Netflix, and Hulu) daily, you were less calm.

Anxious

When you used photo and video apps (apps like Instagram, Snapchat, and Youtube) for less than 33 minutes in a day, you were less anxious.

Also...
