

Welcome to your Insights!

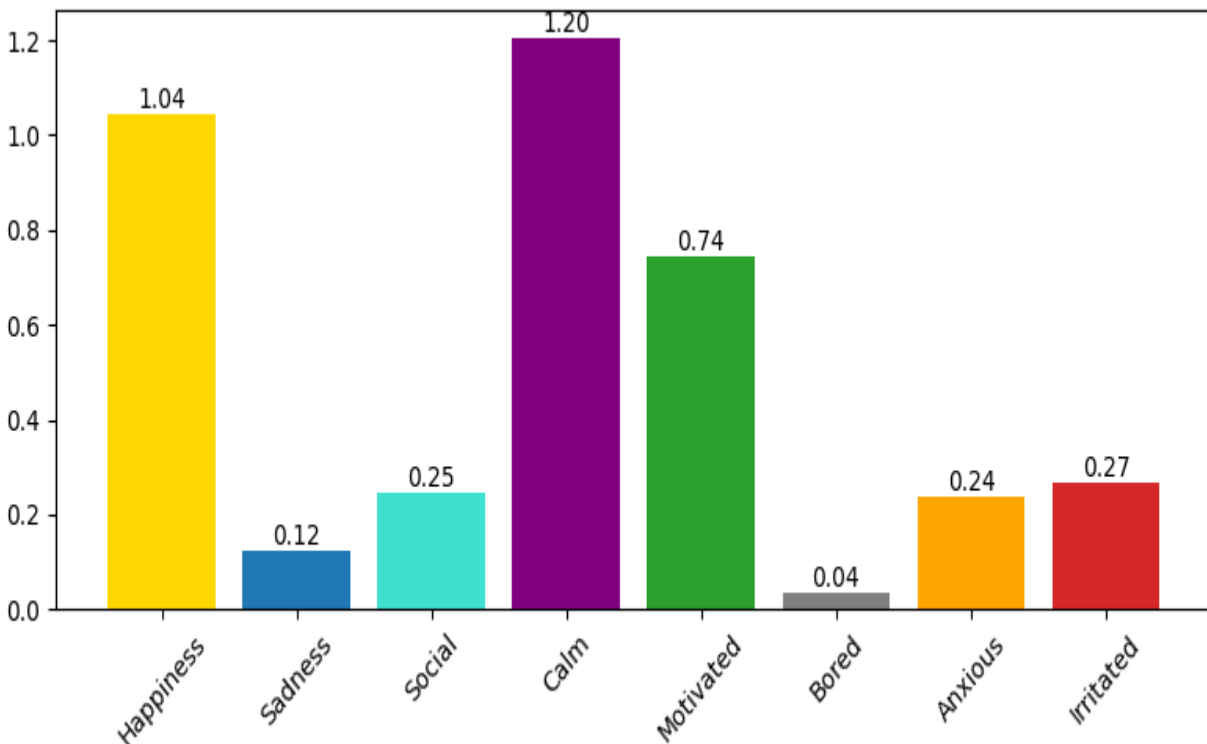

Below you will find insights and trends related to your behavior and reported emotions over the course of the study. Please review with your clinician in your next session.

The number at the top of each bar is the average score of an emotion you felt over the course of the study, ranging from 0 (no emotion) to 3 (greatest amount)!

The taller the bar is, the more you felt that emotion over the last few weeks!

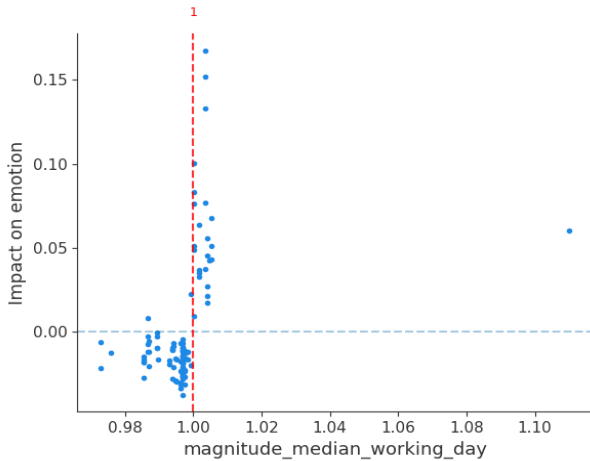

Psst: scroll down to see how your actions corresponded with your feelings!

Over the last few weeks...

Happiness

When your movement was less than walking during the daytime, you were less happy.

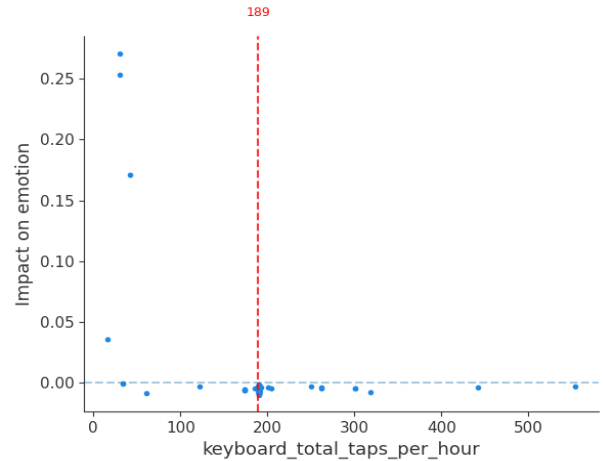

Also...

1. When you sent fewer text messages, you were less happy.
2. When your battery was low, you were less happy.

Sadness

When you tapped your keyboard more than 189 times in an hour, you were less sad.

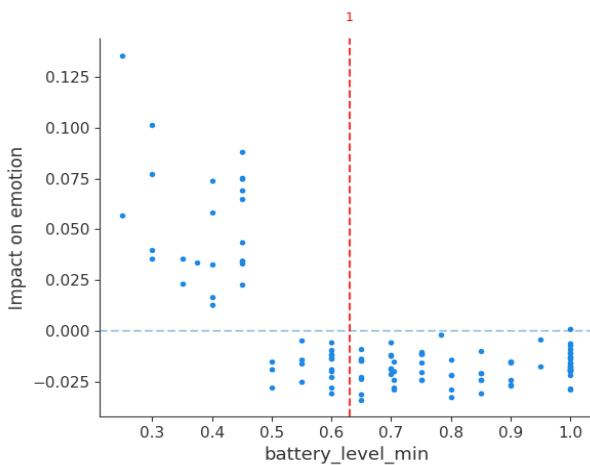

Also...

1. When you spent less time on productivity apps (apps like Gmail, ChatGPT, and Google Drive) daily, you were less sad.
2. When you had dimmer light around you, you were less sad.

Calm

When your lowest battery level was more than 63%, you were less calm.

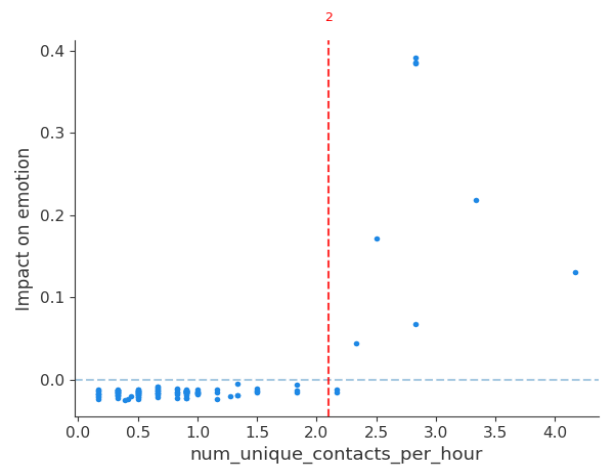

Also...

1. When you had dimmer light around you, you were less calm.
2. When you were messaging fewer people, you were less calm.

Anxious

When you were messaging fewer than 2 people, you were less anxious.

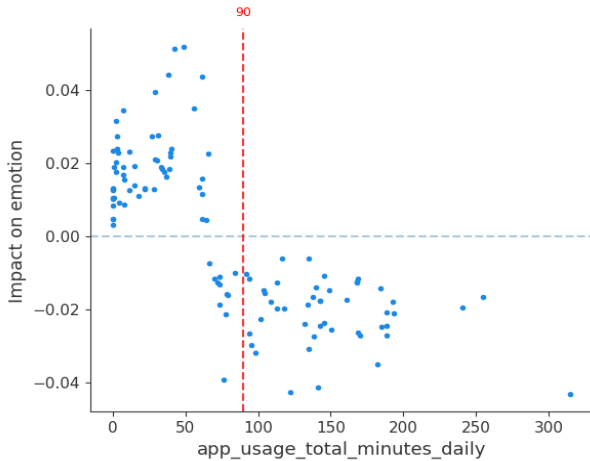

Also...

1. When you called fewer people, you were less anxious.
2. When you spent less time on navigation apps (apps like Google Maps and Transit) daily, you were less anxious.

Over the last few weeks...

Social

When the total time you spent on any apps was less than 90 minutes in a day, you were more social.

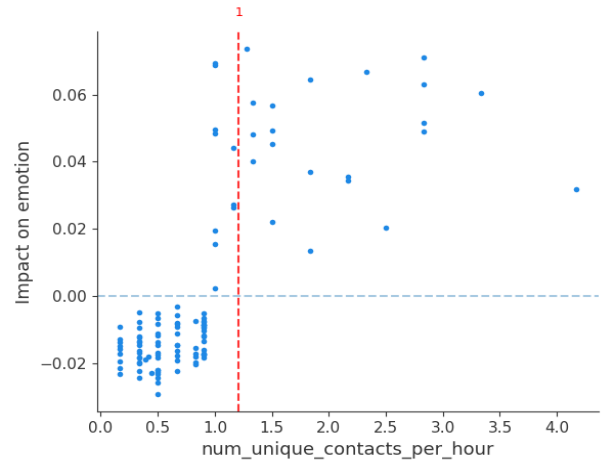

Also...

1. When you were moving less during the daytime, you were more social.
2. When you typed fewer words, on average, you were more social.

Irritated

When you were messaging fewer than 1 person, you were less irritated.

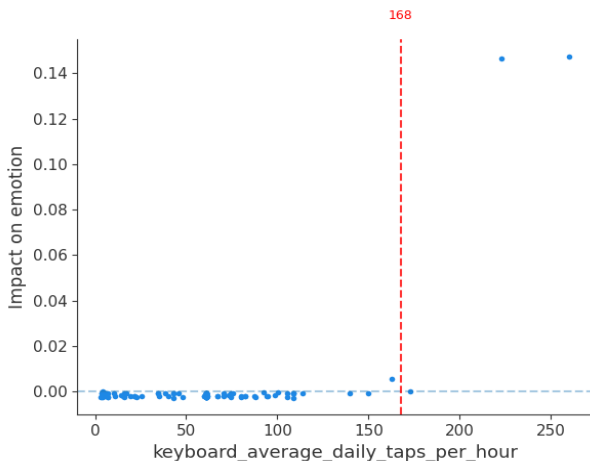

Also...

1. When your minimum movement was less during the daytime, you were less irritated.
2. When you spent less time on any apps on your phone daily, you were less irritated.

Bored

When you tapped your keyboard, on average, fewer than 168 times in an hour, you were less bored.

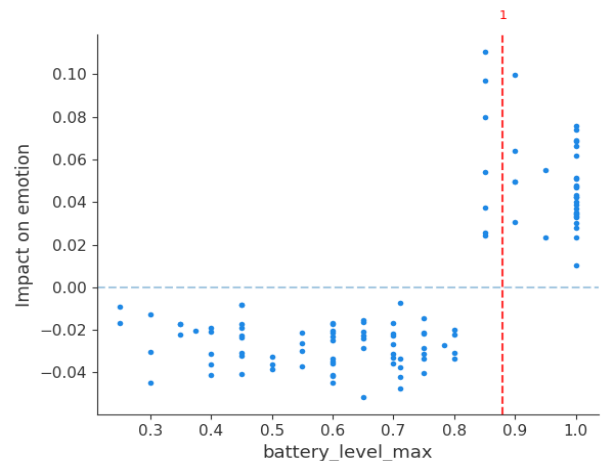

Also...

1. When the light around you changed less, you were less bored.

Motivated

When your highest battery level was less than 88%, you were less motivated.

Also...

1. When you spent less time on any apps on your phone daily, you were less motivated.
2. When your phone screen was awake (includes checking the time, receiving notifications) less times during the day, you were less motivated.
