

# Welcome to your Insights!

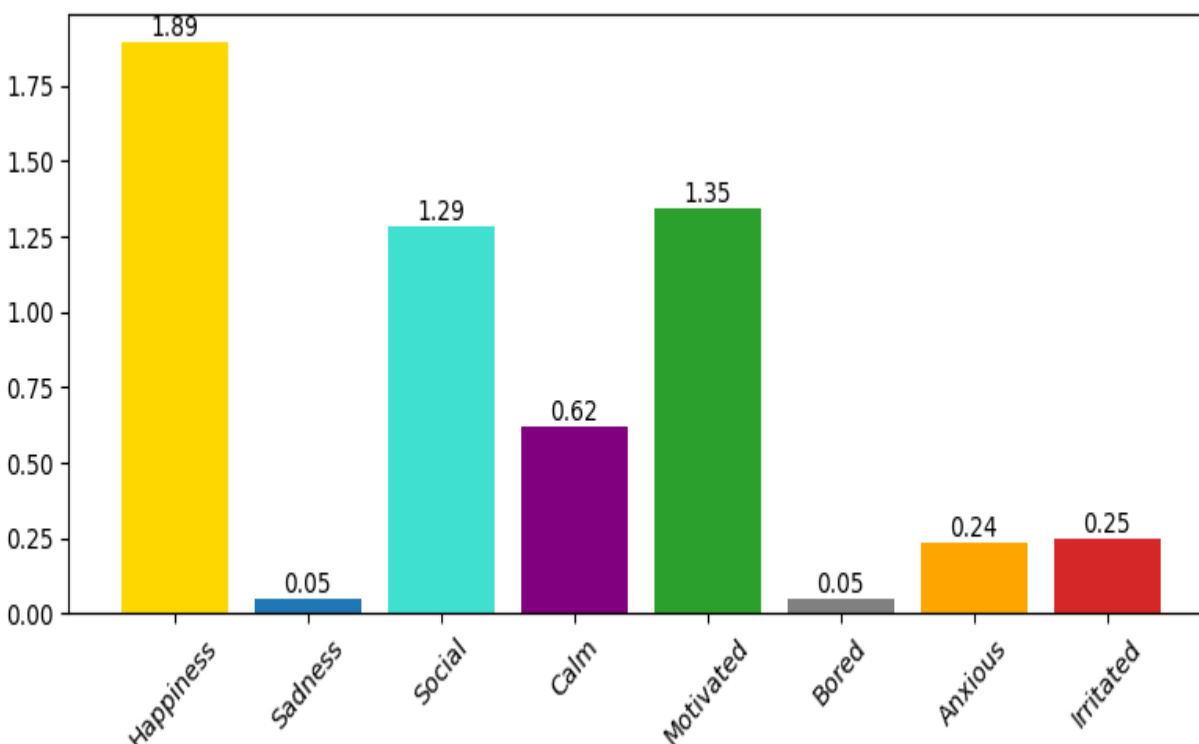

Below you will find insights and trends related to your behavior and reported emotions over the course of the study. Please review with your clinician in your next session.

The number at the top of each bar is the average score of an emotion you felt over the last two weeks, ranging from 0 (no emotion) to 3 (greatest amount)!

The taller the bar is, the more you felt that emotion over the last two weeks!

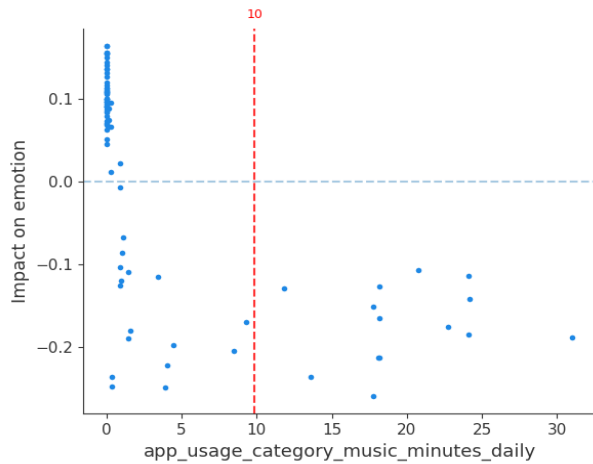

Psst: scroll down to see how your actions corresponded with your feelings!

# Over the last few weeks...

## Happiness

When you used music apps (this may include apps like Spotify and Youtube Music) for less than 10 minutes in a day, you were more happy.

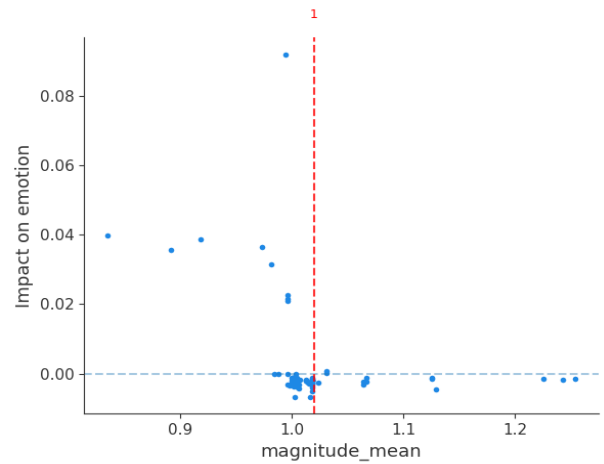

These are the top two actions associated with more happiness:

1. Less time you spent on music apps (this may include apps like Spotify and Youtube Music) in a day
2. Less distance that you traveled

## Sadness

When the average activity you did was similar to or less than mild activity (which includes walking and jogging), you were more sadness.

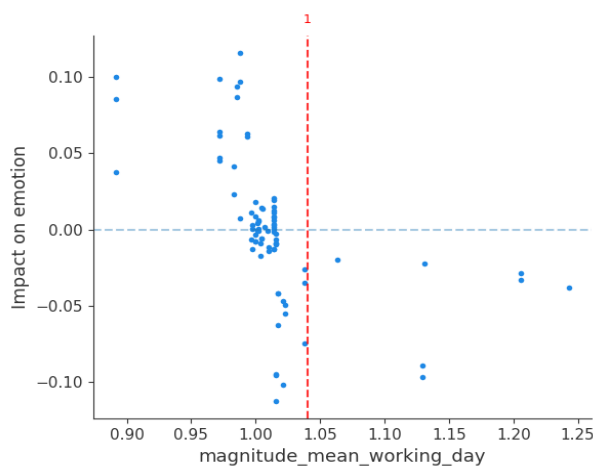

These are the top two actions associated with more sadness:

1. Less average activity for you
2. Less time you spent on navigation apps (this may include apps like Google Maps and Transit) in a day

## Calm

When the average activity you did was similar to or less than mild activity (which includes walking and jogging) during the daytime, you were more calm.

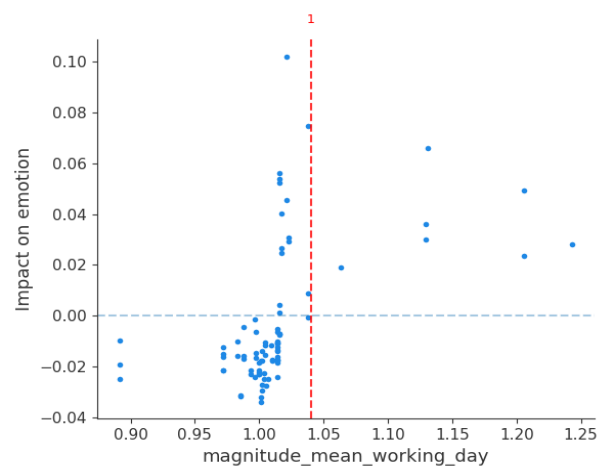

These are the top two actions associated with feeling calmer:

1. Less average activity for you during the daytime
2. Less area covered while you were traveling

## Anxious

When the average activity you did was similar to or less than mild activity (which includes walking and jogging) during the daytime, you were less anxious.

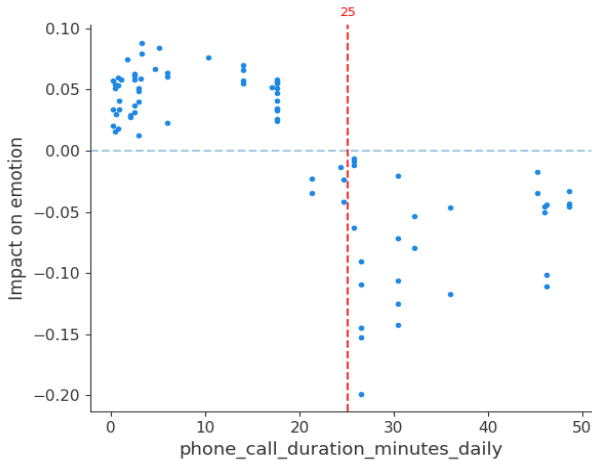

These are the top two actions associated with feeling less anxious:

1. Less average activity for you during the daytime
2. Less time you spent on phone calls in a day

# Over the last few weeks..

## Social
