

Welcome to your Insights!

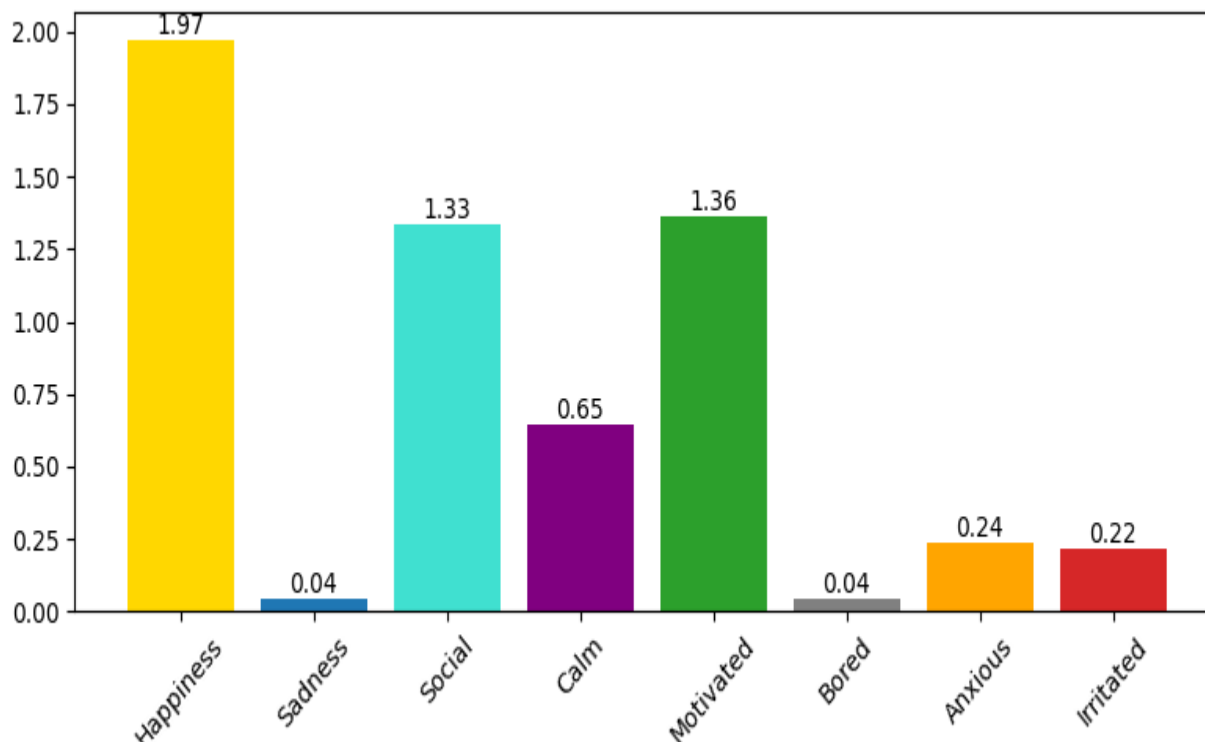

Below you will find insights and trends related to your behavior and reported emotions over the course of the study. Please review with your clinician in your next session.

The number at the top of each bar is the average score of an emotion you felt over the last two weeks, ranging from 0 (no emotion) to 3 (greatest amount)!

The taller the bar is, the more you felt that emotion over the last two weeks!

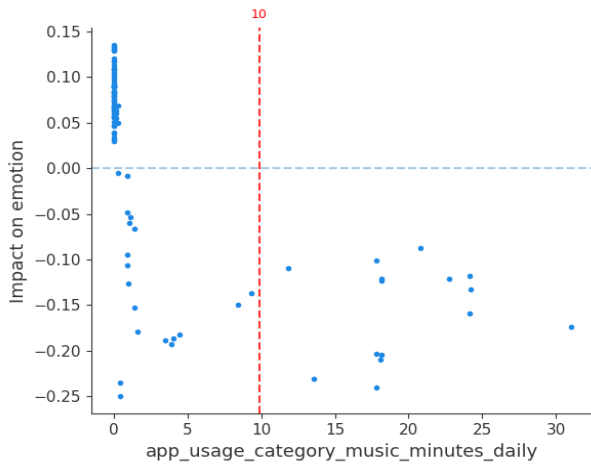

Psst: scroll down to see how your actions corresponded with your feelings!

Over the last few weeks...

Happiness

When you used music apps (this may include apps like Spotify and Youtube Music) for less than 10 minutes in a day, you were more happy.

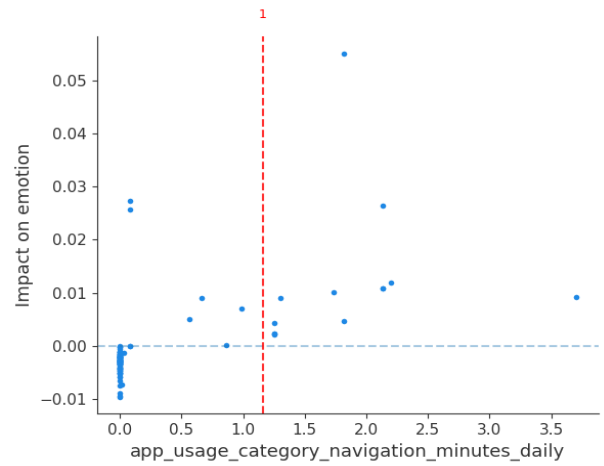

These are the top two actions associated with more happiness:

1. Less time you spent on music apps (this may include apps like Spotify and Youtube Music) in a day
2. Less distance that you traveled

Sadness

When you used navigation apps (this may include apps like Google Maps and Transit) for less than 1 minutes in a day, you were less sad.

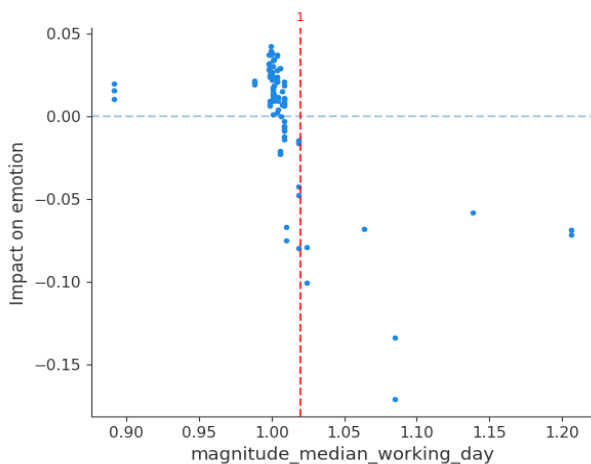

These are the top two actions associated with less sadness:

1. Less time you spent on navigation apps (this may include apps like Google Maps and Transit) in a day
2. Less average activity for you

Calm

When the typical activity you did was similar to or less than mild activity (which includes walking and jogging) during the daytime, you were more calm.

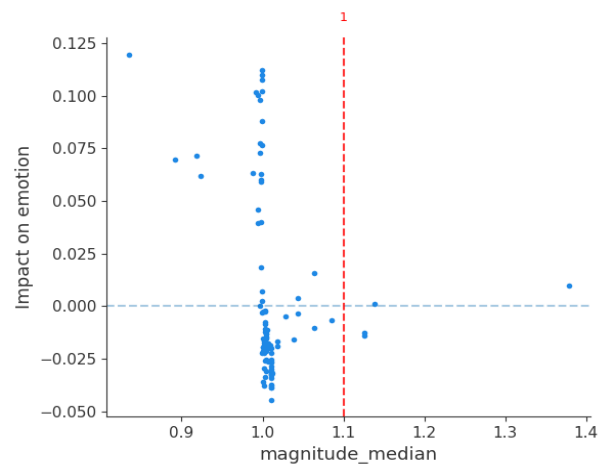

These are the top two actions associated with feeling calmer:

1. Less typical activity you did during the daytime
2. More average activity for you during the daytime

Anxious

When the typical activity you did was similar to or less than mild activity (which includes walking and jogging) , you were more anxious.

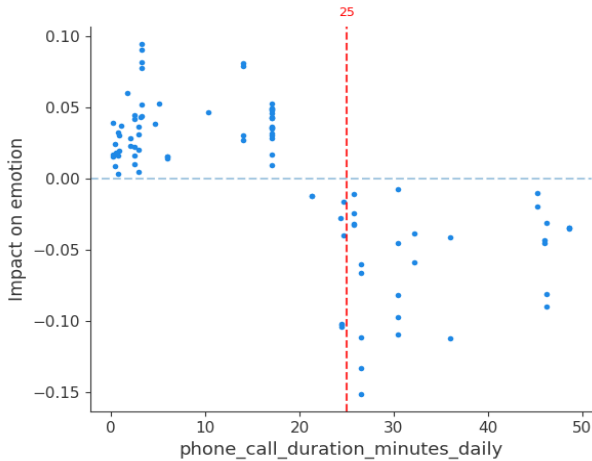

These are the top two actions associated with feeling more anxious:

1. Less typical activity you have done
2. More typical activity you did during the daytime

Over the last few weeks..

Social

When you called for less than 25 minutes in a day, you were more social.

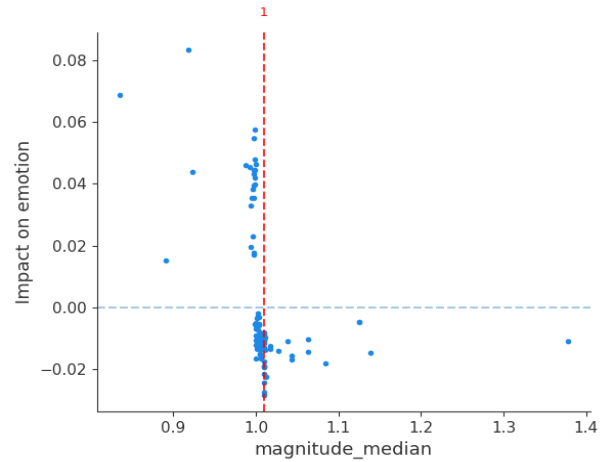

These are the top two actions associated with being more social:
