

Welcome to your Insights!

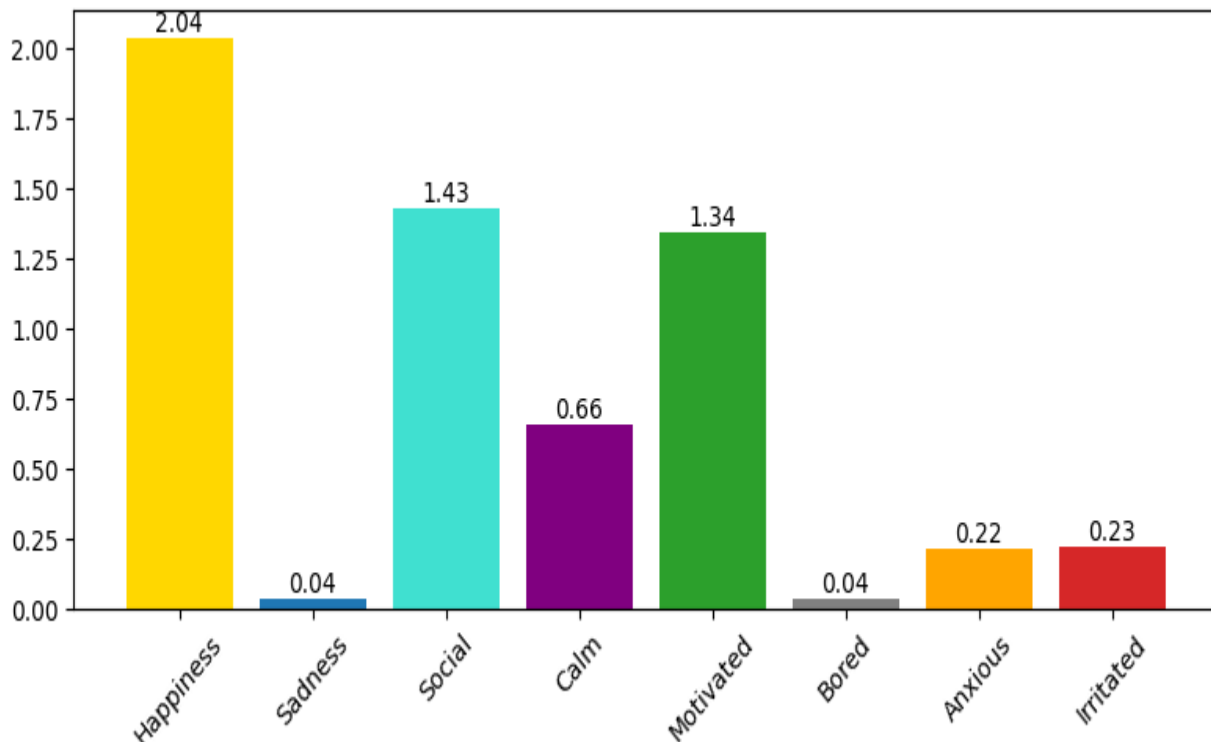

Below you will find insights and trends related to your behavior and reported emotions over the course of the study. Please review with your clinician in your next session.

The number at the top of each bar is the average score of an emotion you felt over the last two weeks, ranging from 0 (no emotion) to 3 (greatest amount)!

The taller the bar is, the more you felt that emotion over the last two weeks!

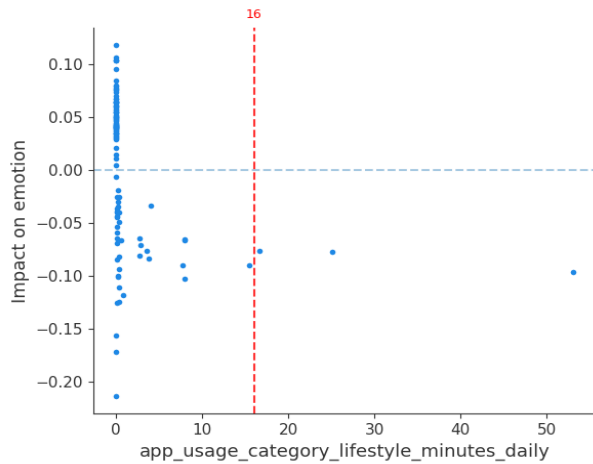

Psst: scroll down to see how your actions corresponded with your feelings!

Over the last few weeks...

Happiness

When you used lifestyle apps (this may include apps like Pinterest, Tinder, and Bumble) for less than 16 minutes in a day, you were more happy.

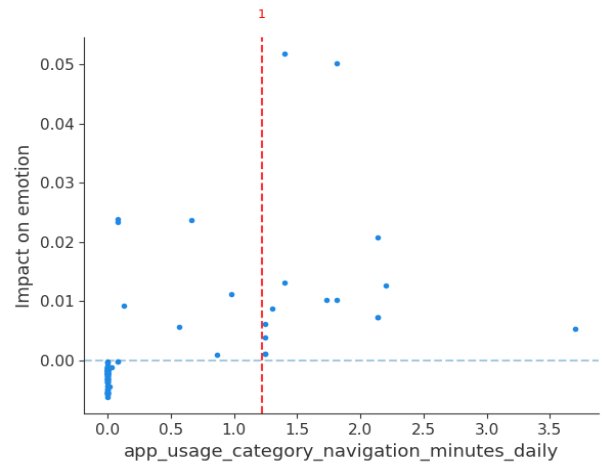

These are the top two actions associated with more happiness:

1. Less time you spent on lifestyle apps (this may include apps like Pinterest and Lemon8) in a day
2. Less time you spent on music apps (this may include apps like Spotify and Youtube Music) in a day

Sadness

When you used navigation apps (this may include apps like Google Maps and Transit) for less than 1 minutes in a day, you were less sad.

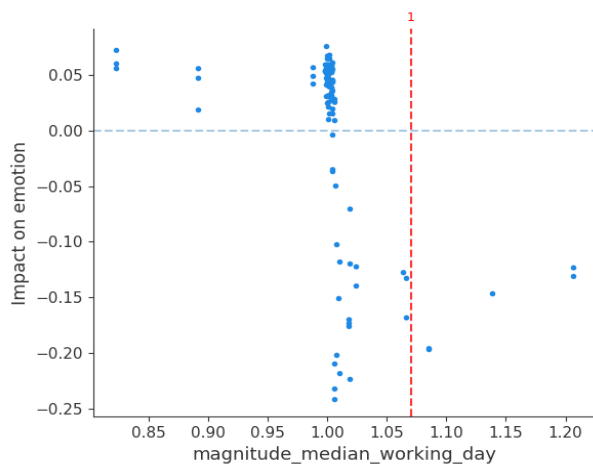

These are the top two actions associated with less sadness:

1. Less time you spent on navigation apps (this may include apps like Google Maps and Transit) in a day
2. Less higher activity

Calm

When the typical activity you did was similar to or less than mild activity (which includes walking and jogging) during the daytime, you were more calm.

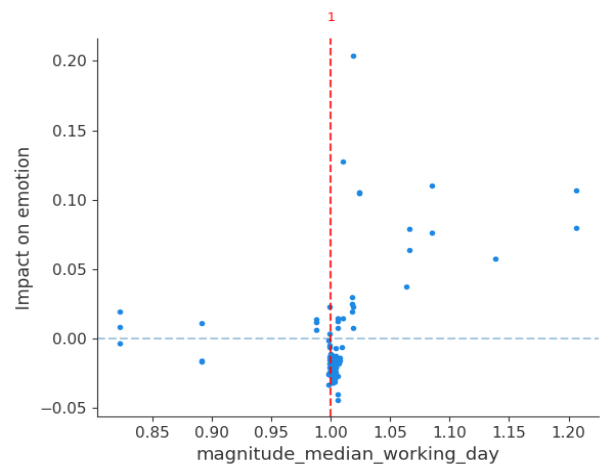

These are the top two actions associated with feeling calmer:

1. Less typical activity you did during the daytime
2. Less average activity for you during the daytime

Anxious

When the typical activity you did was similar to or more than mild activity (which includes walking and jogging) during the daytime, you were more anxious.

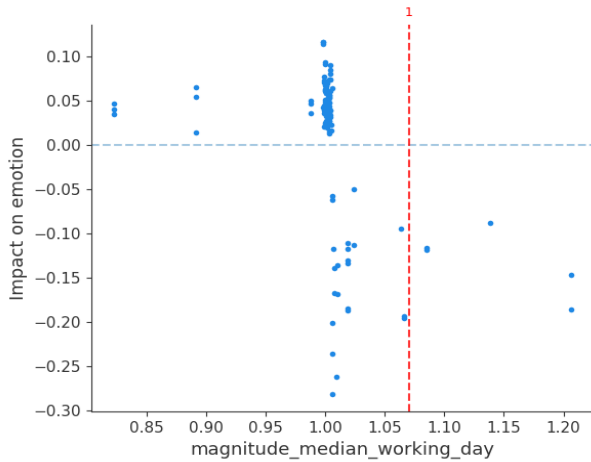

These are the top two actions associated with feeling more anxious:

1. More typical activity you did during the daytime
2. Less typical activity you have done

Over the last few weeks..

Social

When the typical activity you did was similar to or less than mild activity (which includes walking and jogging) during the daytime, you were more social.

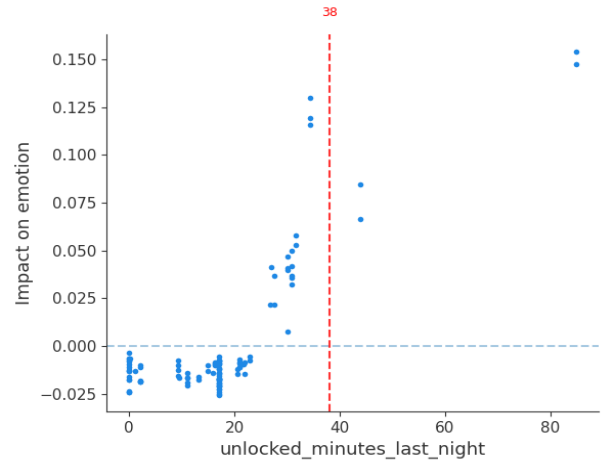

These are the top two actions associated with being more social:

1. Less typical activity you did during the daytime
2. Less bright amount of light

Irritated

When you unlocked your phone for less than 38 minutes during the night, you were less irritated.

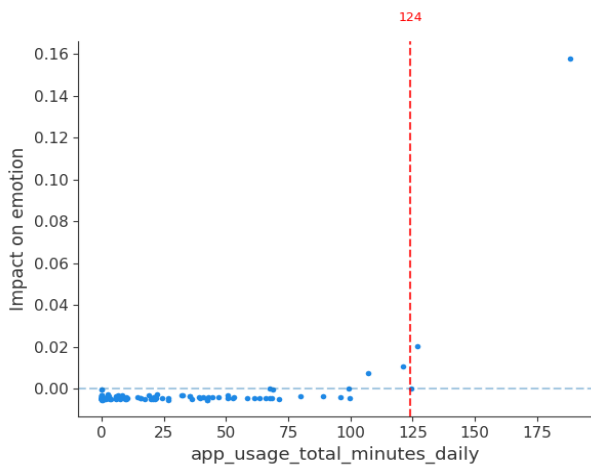

These are the top two actions associated with feeling less irritated:

1. Less time your phone was unlocked during the night
2. Less typical activity you have done

Bored

When the total time you spent on any apps was less than 124 minutes in a day, you were less bored.

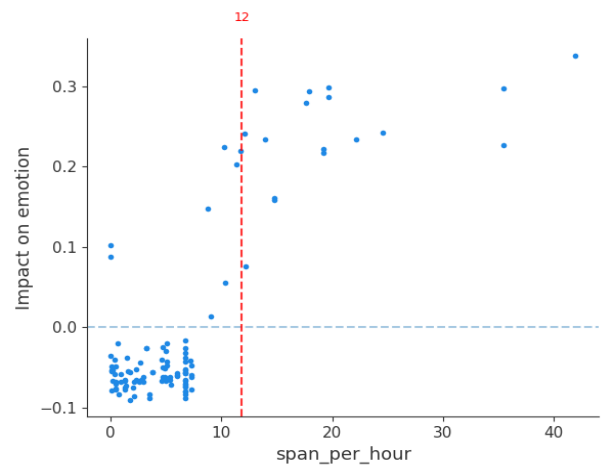

These are the top two actions associated with feeling less bored:

1. Less time you spent on any app on your phone in a day
2. More lower activity

Motivated

When you traveled large distances that were less than 12 miles, you were less motivated.

These are the top two actions associated with feeling less motivated:

1. Less large distances you traveled
2. Less dim amount of light
