

Welcome to your Insights!

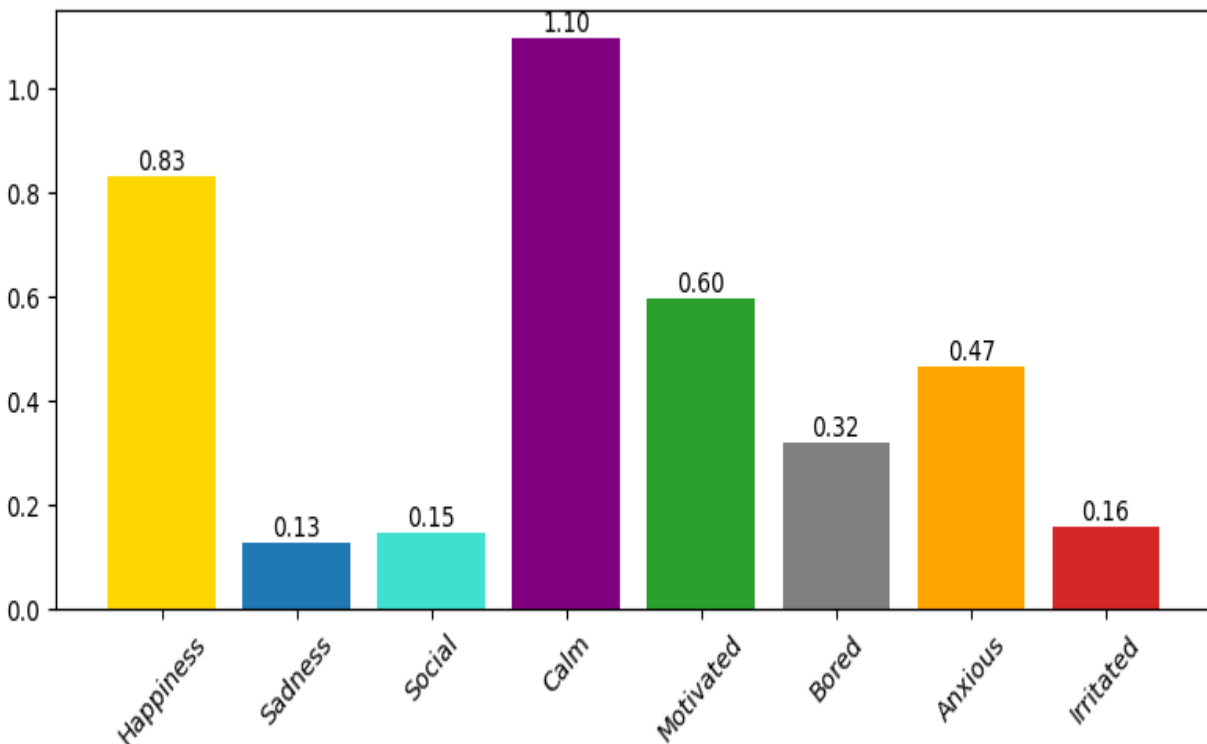

Below you will find insights and trends related to your behavior and reported emotions over the course of the study. Please review with your clinician in your next session.

The number at the top of each bar is the average score of an emotion you felt over the last two weeks, ranging from 0 (no emotion) to 3 (greatest amount)!

The taller the bar is, the more you felt that emotion over the last two weeks!

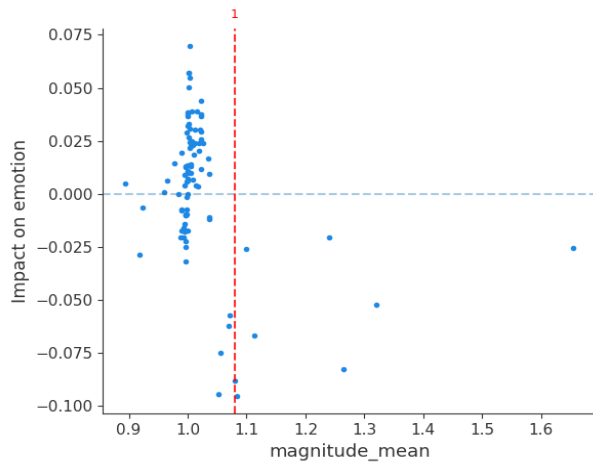

Psst: scroll down to see how your actions corresponded with your feelings!

Over the last few weeks...

Happiness

When the average activity you did was similar to or less than mild activity (which includes walking and jogging), you were more happiness.

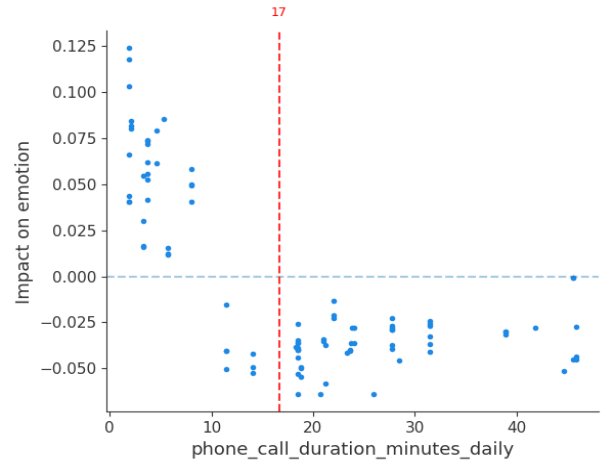

These are the top two actions associated with more happiness:

1. Less average activity for you
2. Less time you spent on phone calls in a day

Sadness

When you called for more than 17 minutes in a day, you were less sad.

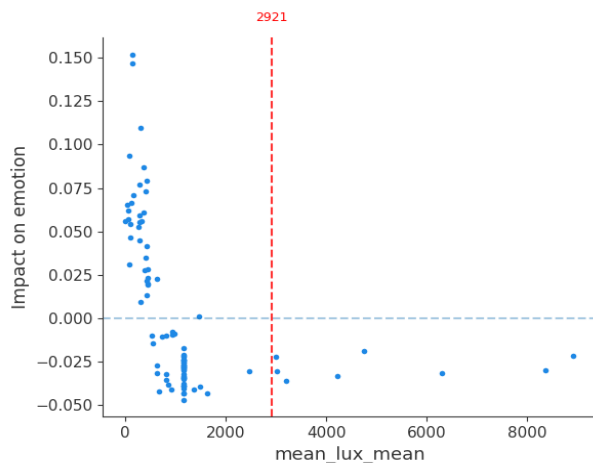

These are the top two actions associated with less sadness:

1. More time you spent on phone calls in a day
2. More phone unlocks during the day

Calm

When the typical brightness of light around you was less than daylight, you were more calm.

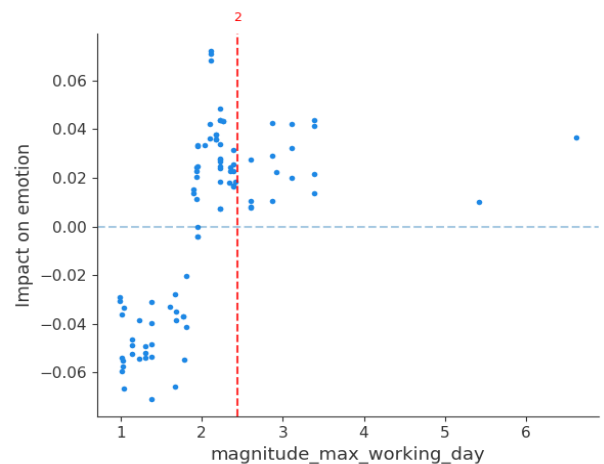

These are the top two actions associated with feeling calmer:

1. Less typical amount of light for you
2. Less text messages you sent during a couple hours of phone usage

Anxious

When the greatest activity you did was similar to or less than moderate activity (which includes intense biking and running) during the daytime, you were less anxious.

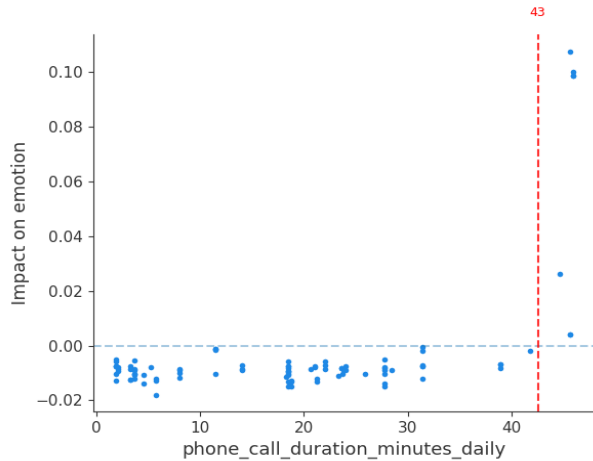

These are the top two actions associated with feeling less anxious:

1. Less higher activity
2. Less average activity for you

Over the last few weeks..

Social

When you called for less than 43 minutes in a day, you were less social.

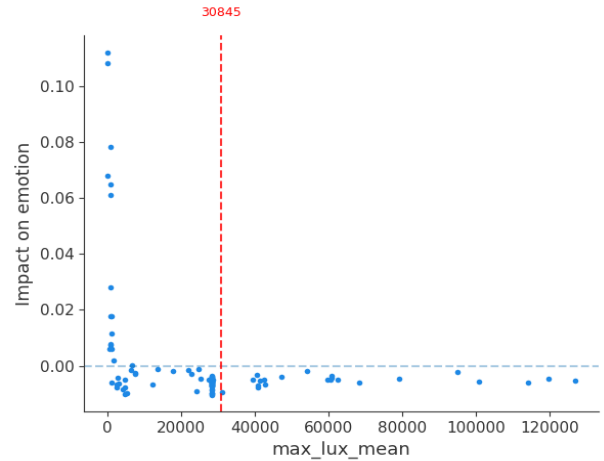

These are the top two actions associated with being less social:

1. Less time you spent on phone calls in a day
2. Less large distances you traveled

Irritated

When the brightest light around you was less than bright sunlight, you were more irritated.

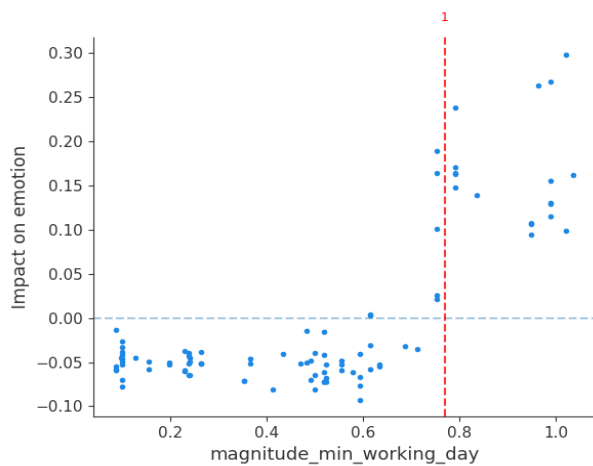

These are the top two actions associated with feeling more irritated:

1. Less bright amount of light
2. Less higher activity

Bored

When the lowest activity you did was similar to or less than mild activity (which includes walking and jogging) during the daytime, you were less bored.

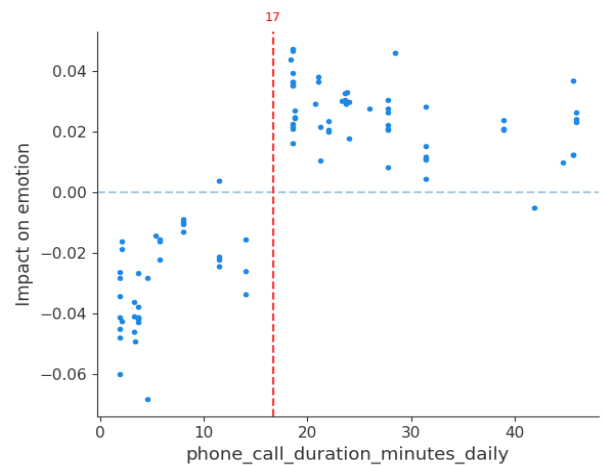

These are the top two actions associated with feeling less bored:

1. Less lower activity
2. Less lower activity

Motivated

When you called for more than 17 minutes in a day, you were more motivated.

These are the top two actions associated with feeling more motivated:

1. More time you spent on phone calls in a day
2. Less higher activity
