

Welcome to your Insights!

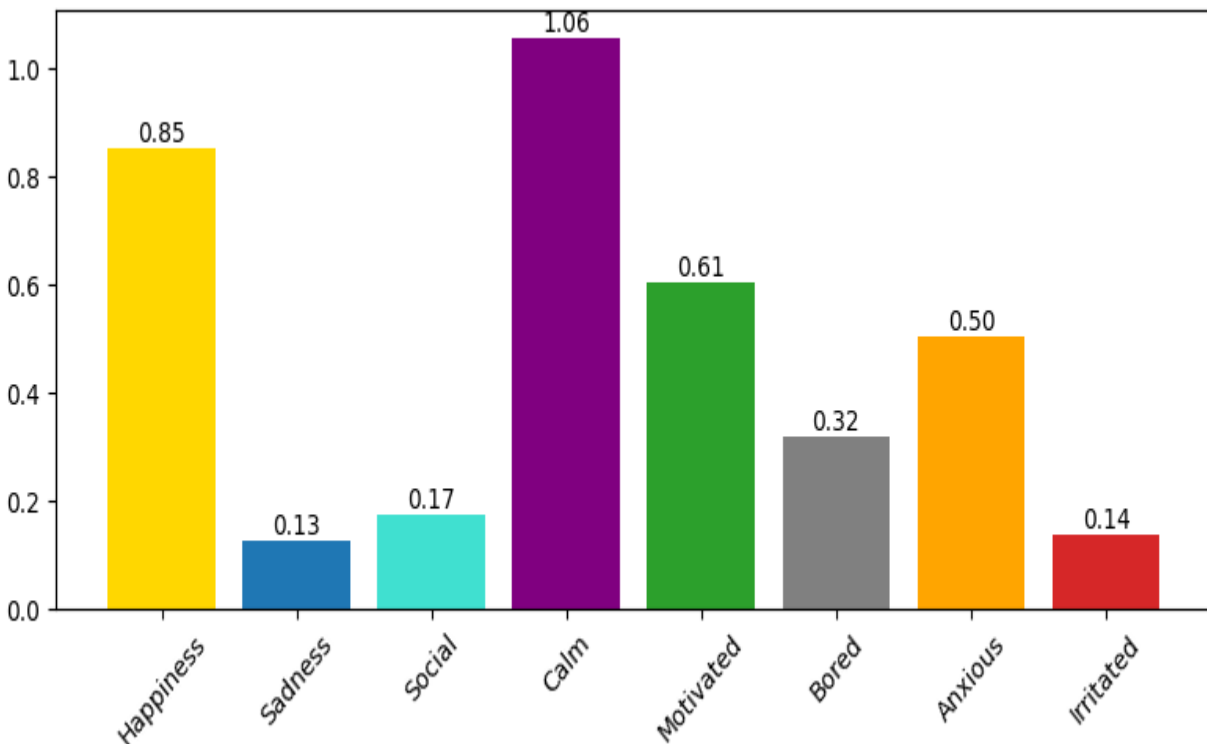

Below you will find insights and trends related to your behavior and reported emotions over the course of the study. Please review with your clinician in your next session.

The number at the top of each bar is the average score of an emotion you felt over the last two weeks, ranging from 0 (no emotion) to 3 (greatest amount)!

The taller the bar is, the more you felt that emotion over the last two weeks!

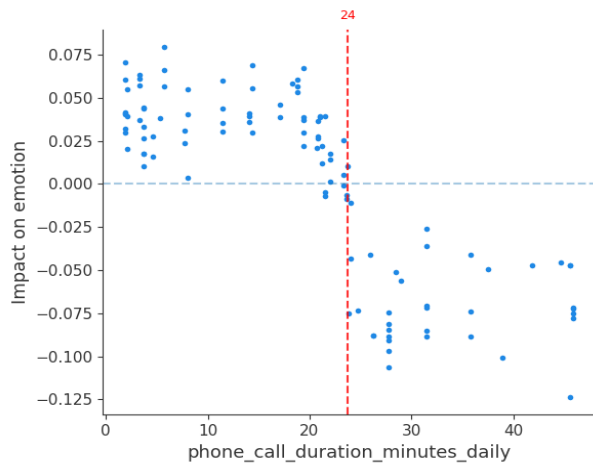

Psst: scroll down to see how your actions corresponded with your feelings!

Over the last few weeks...

Happiness

When you called for less than 24 minutes in a day, you were more happy.

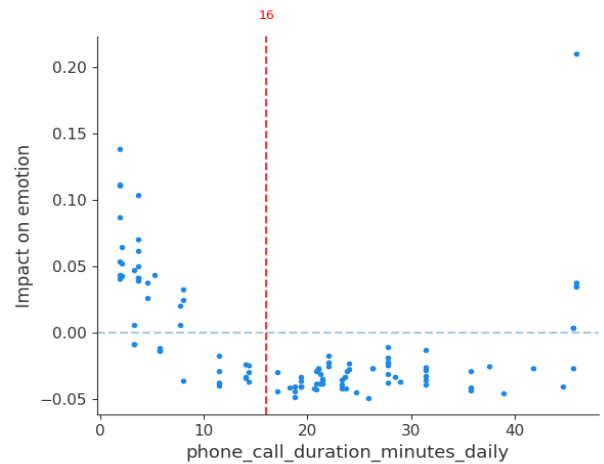

These are the top two actions associated with more happiness:

1. Less time you spent on phone calls in a day
2. Less higher activity

Sadness

When you called for more than 16 minutes in a day, you were less sad.

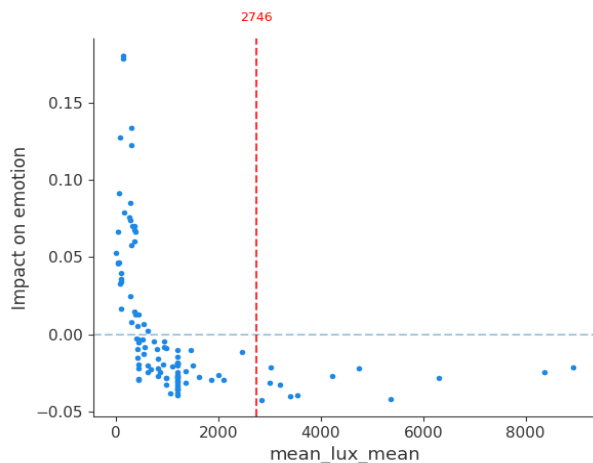

These are the top two actions associated with less sadness:

1. More time you spent on phone calls in a day
2. More lower activity

Calm

When the typical brightness of light around you was less than daylight, you were more calm.

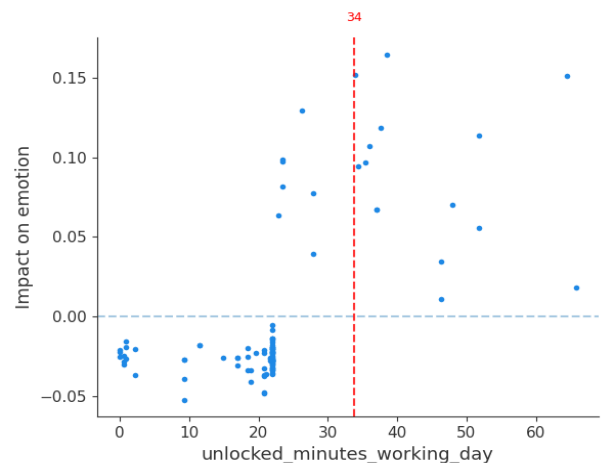

These are the top two actions associated with feeling calmer:

1. Less typical amount of light for you
2. Less text messages you sent during a couple hours of phone usage

Anxious

When you unlocked your phone for less than 34 minutes during the day, you were less anxious.

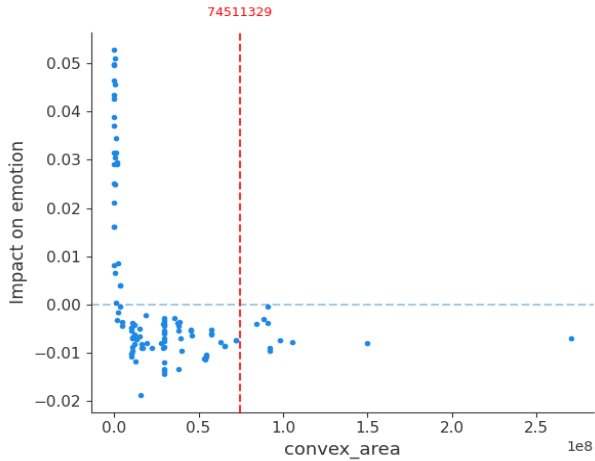

These are the top two actions associated with feeling less anxious:

1. Less time your phone was unlocked during the day
2. Less time you spent on health and fitness apps (this may include apps like Calm and Planet Fitness)

Over the last few weeks..

Social

When the area that you covered while traveling was less than the city of Paris, you were more social.

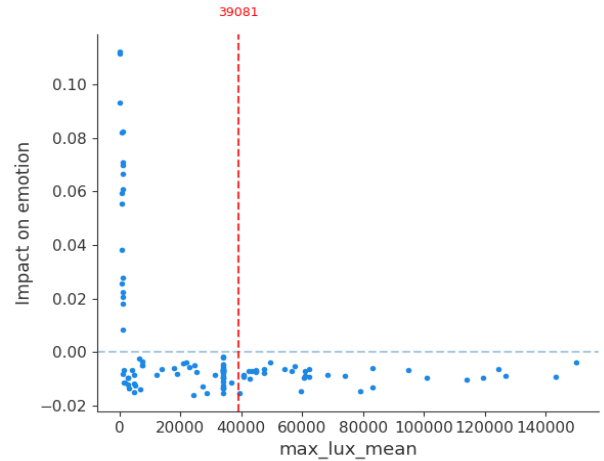

These are the top two actions associated with being more social:

1. Less area covered while you were traveling
2. Less time you spent on phone calls in a day

Irritated

When the brightest light around you was less than bright sunlight, you were more irritated.

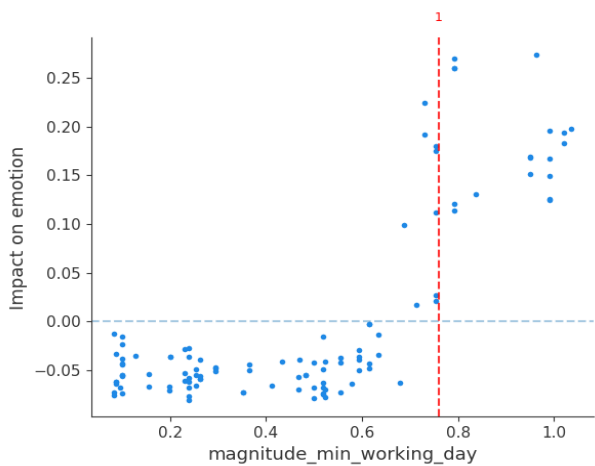

These are the top two actions associated with feeling more irritated:

1. Less bright amount of light
2. Less higher activity

Bored

When the lowest activity you did was similar to or less than mild activity (which includes walking and jogging) during the daytime, you were less bored.

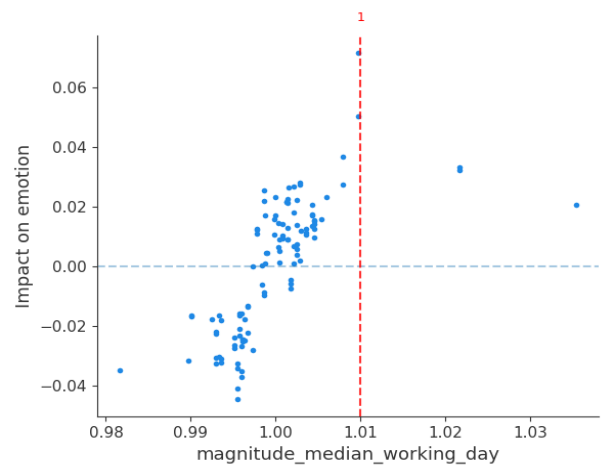

These are the top two actions associated with feeling less bored:

1. Less lower activity
2. Less area covered while you were traveling

Motivated

When the typical activity you did was similar to or less than mild activity (which includes walking and jogging) during the daytime, you were less motivated.

These are the top two actions associated with feeling less motivated:

1. Less typical activity you did during the daytime
2. Less time you spent on any app on your phone in a day
