

Welcome to your Insights!

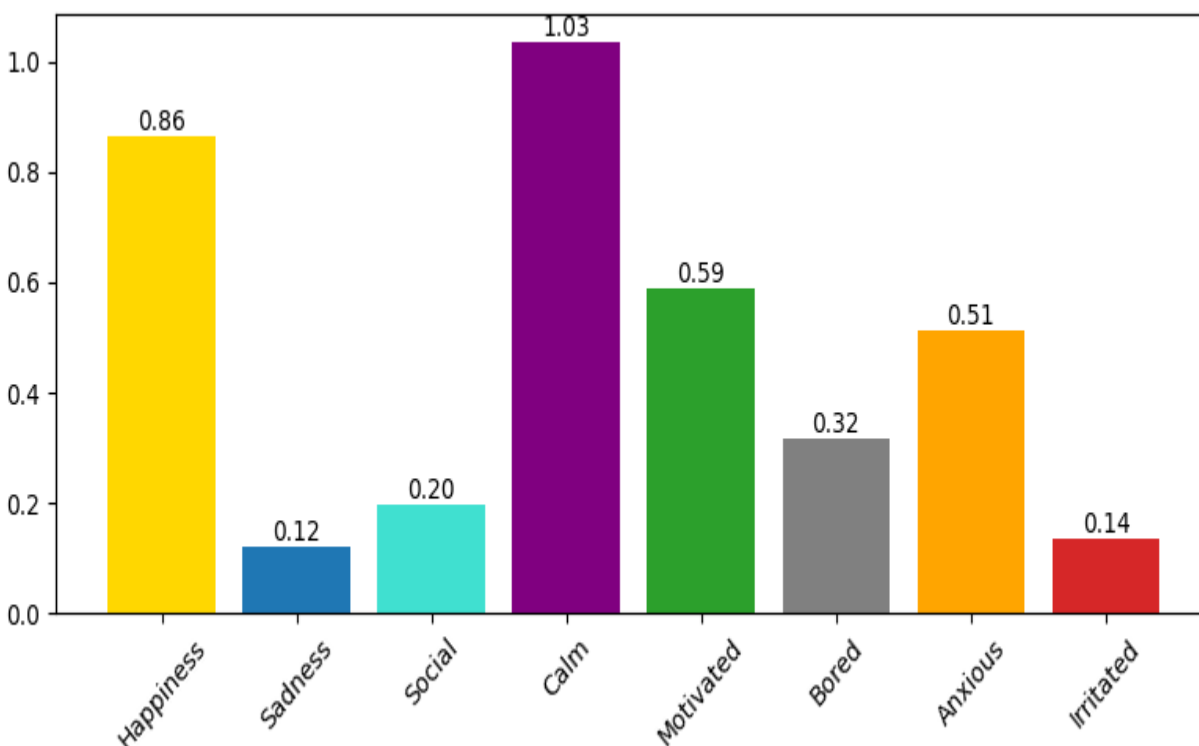

Below you will find insights and trends related to your behavior and reported emotions over the course of the study. Please review with your clinician in your next session.

The number at the top of each bar is the average score of an emotion you felt over the last two weeks, ranging from 0 (no emotion) to 3 (greatest amount)!

The taller the bar is, the more you felt that emotion over the last two weeks!

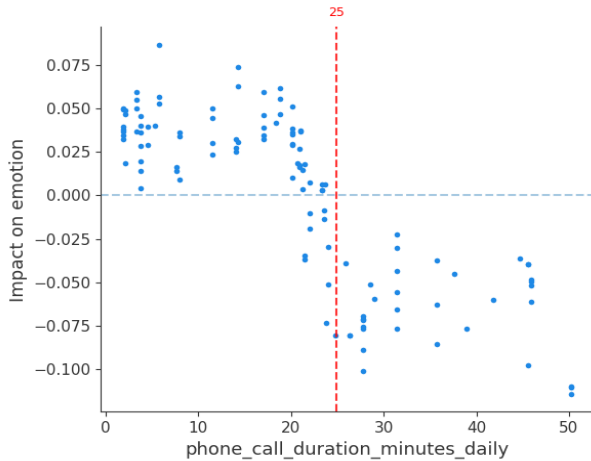

Psst: scroll down to see how your actions corresponded with your feelings!

Over the last few weeks...

Happiness

When you called for less than 25 minutes in a day, you were more happy.

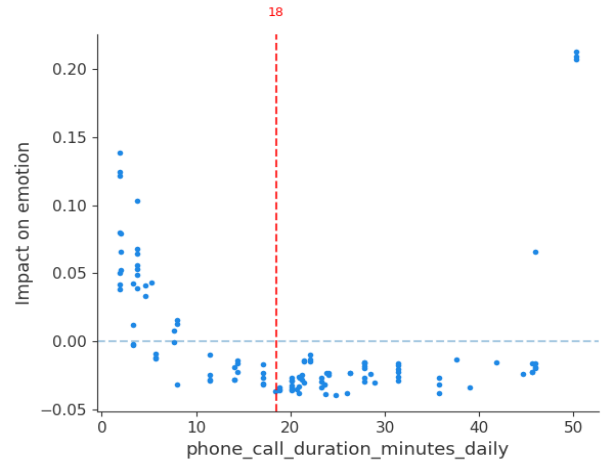

These are the top two actions associated with more happiness:

1. Less time you spent on phone calls in a day
2. Less lower activity

Sadness

When you called for more than 18 minutes in a day, you were less sad.

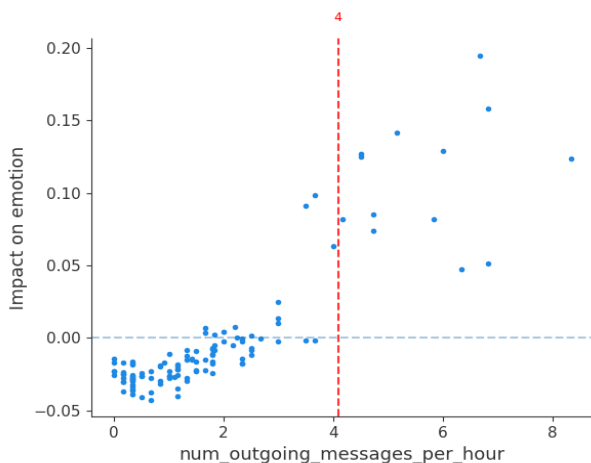

These are the top two actions associated with less sadness:

1. More time you spent on phone calls in a day
2. Less phone unlocks during the day

Calm

When you sent less than 4 text messages , you were less calm.

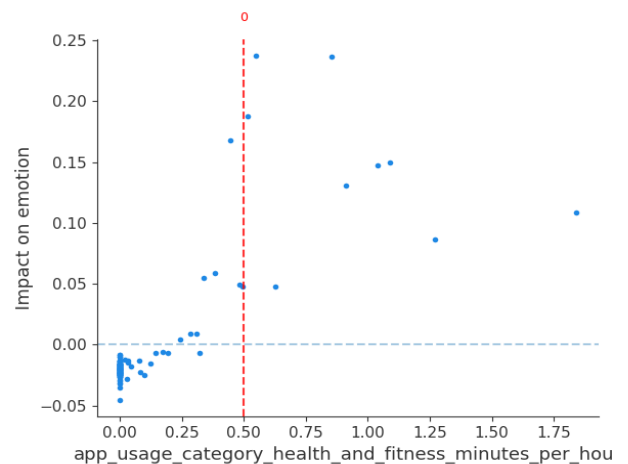

These are the top two actions associated with feeling less calm:

1. Less text messages you sent during a couple hours of phone usage
2. Less typical amount of light for you

Anxious

When you used health and fitness apps (this may include apps like Calm and Planet Fitness) for less than 0 minutes , you were less anxious.

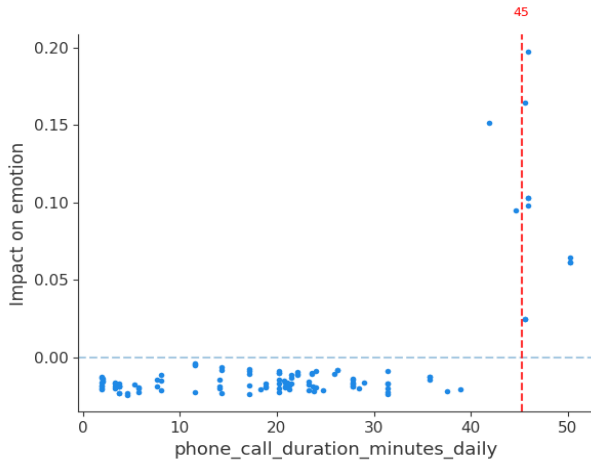

These are the top two actions associated with feeling less anxious:

1. Less time you spent on health and fitness apps (this may include apps like Calm and Planet Fitness)
2. Less screen wakes (includes checking the time, receiving notifications) during the night

Over the last few weeks..

Social

When you called for less than 45 minutes in a day, you were less social.

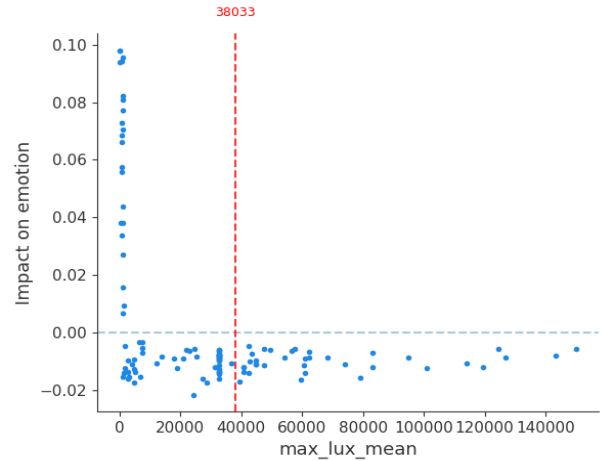

These are the top two actions associated with being less social:

1. Less time you spent on phone calls in a day
2. Less area covered while you were traveling

Irritated

When the brightest light around you was less than bright sunlight, you were more irritated.

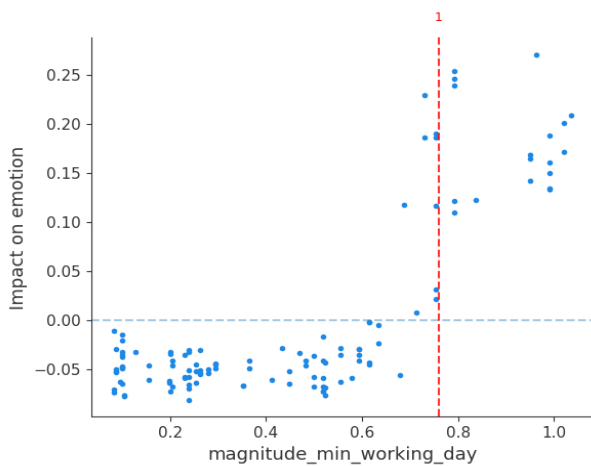

These are the top two actions associated with feeling more irritated:

1. Less bright amount of light
2. Less variability in the amount of light

Bored

When the lowest activity you did was similar to or less than mild activity (which includes walking and jogging) during the daytime, you were less bored.

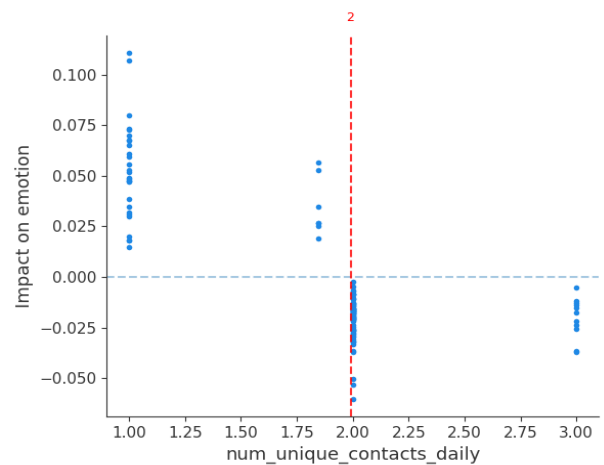

These are the top two actions associated with feeling less bored:

1. Less lower activity
2. Less area covered while you were traveling

Motivated

When you called more than 2 different people in a day, you were less motivated.

These are the top two actions associated with feeling less motivated:

1. More people you called in a day
2. Less large distances you traveled
