

Welcome to your Insights!

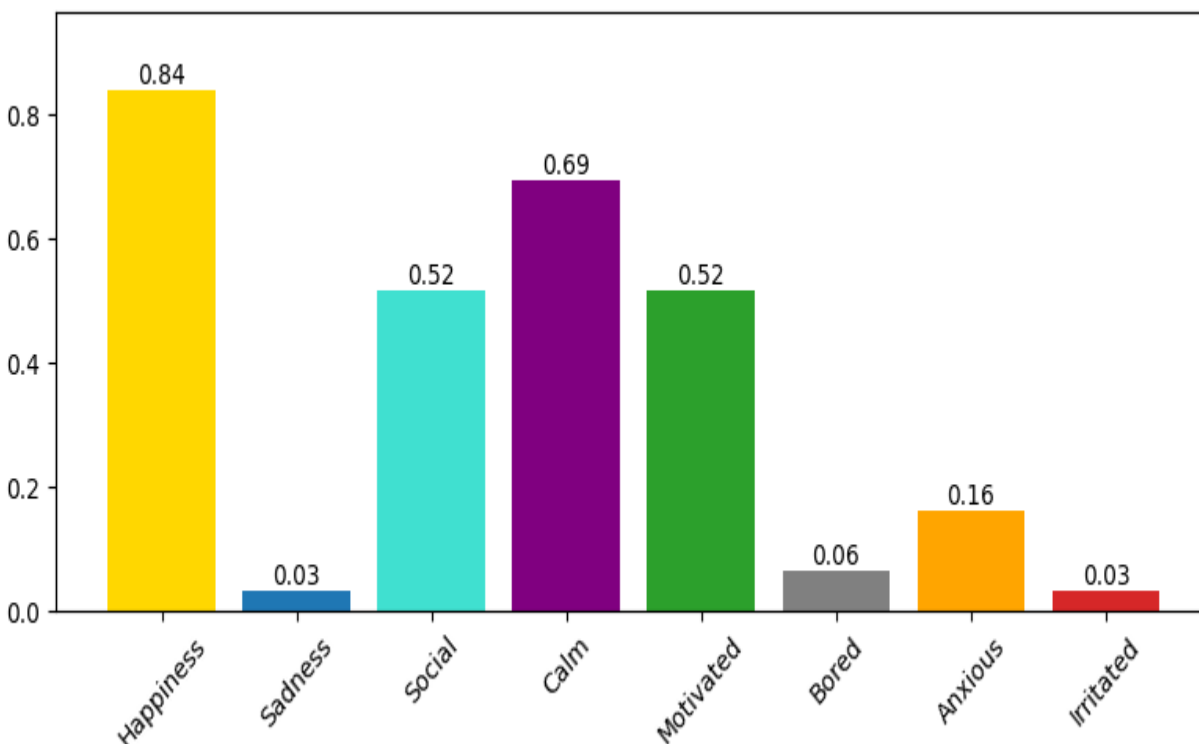

Below you will find insights and trends related to your behavior and reported emotions over the course of the study. Please review with your clinician in your next session.

The number at the top of each bar is the average score of an emotion you felt over the course of the study, ranging from 0 (no emotion) to 3 (greatest amount)!

The taller the bar is, the more you felt that emotion over the last few weeks!

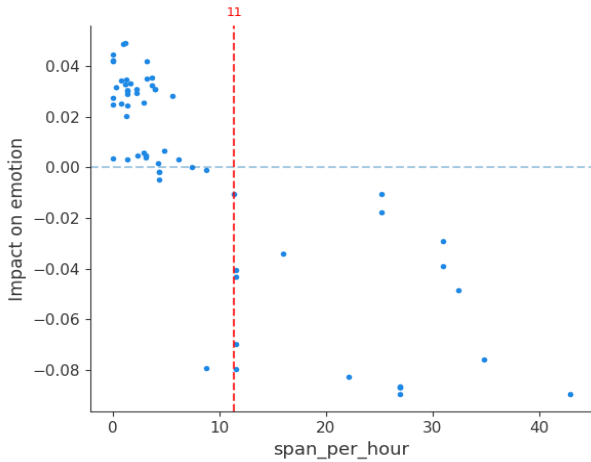

Psst: scroll down to see how your actions corresponded with your feelings!

Over the last few weeks...

Happiness

When you traveled less than 11 miles, you were more happy.

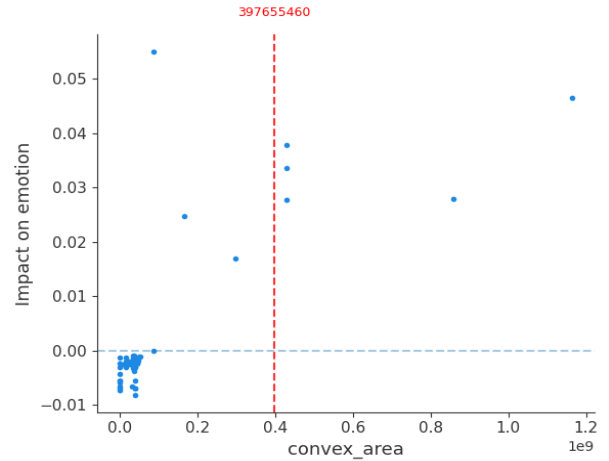

Also...

1. When your phone screen was awake (includes checking the time, receiving notifications) less times, you were more happy.
2. When you traveled shorter distances, you were more happy.

Sadness

When the area that you traveled was less than the city of Denver, you were less sad.

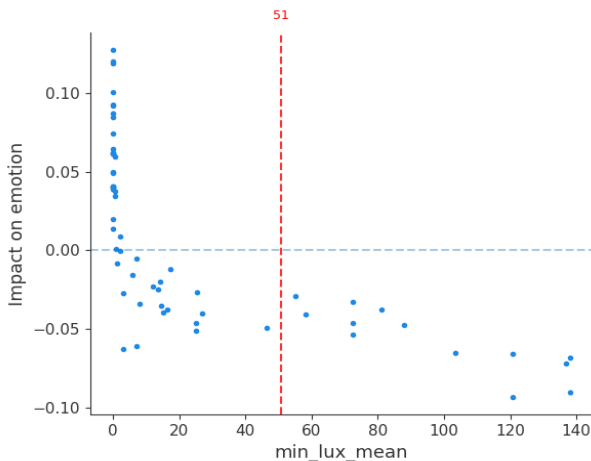

Also...

1. When you were moving less during the daytime, you were less sad.
2. When you were sleeping more, you were less sad.

Calm

When the dimmest light around you was dimmer than a living room, you were more calm.

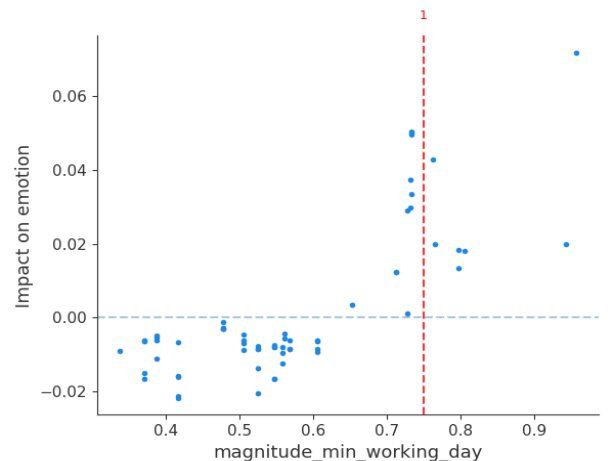

Also...

1. When your battery was high, you were more calm.
2. When you were moving less, you were more calm.

Anxious

On days when your slowest movement during the day was slower than walking, you were less anxious.

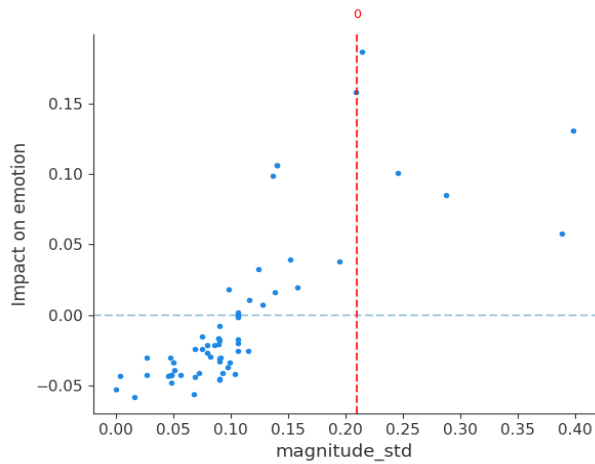

Also...

1. When the dimmest light around you was dimmer, you were less anxious.
2. When you tapped your phone keyboard fewer times, on average, you were less anxious.

Over the last few weeks...

Social
