

Welcome to your Insights!

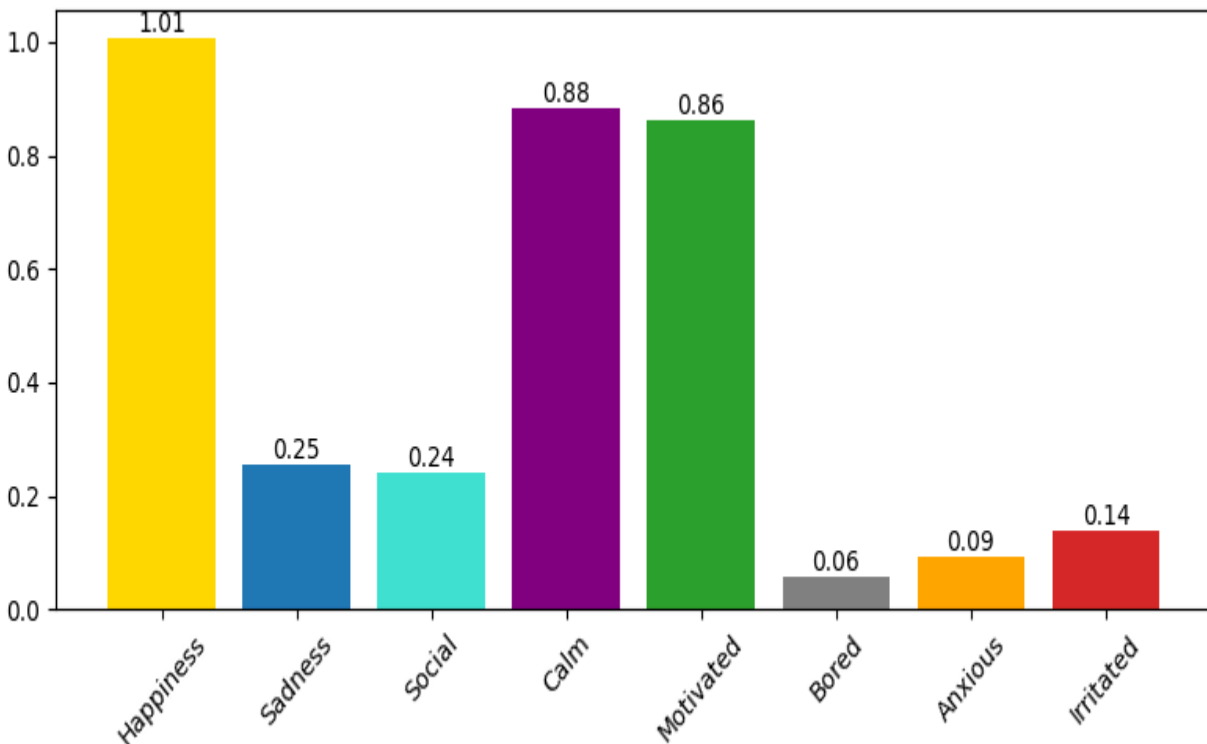

Below you will find insights and trends related to your behavior and reported emotions over the course of the study. Please review with your clinician in your next session.

The number at the top of each bar is the average score of an emotion you felt over the course of the study, ranging from 0 (no emotion) to 3 (greatest amount)!

The taller the bar is, the more you felt that emotion over the last few weeks!

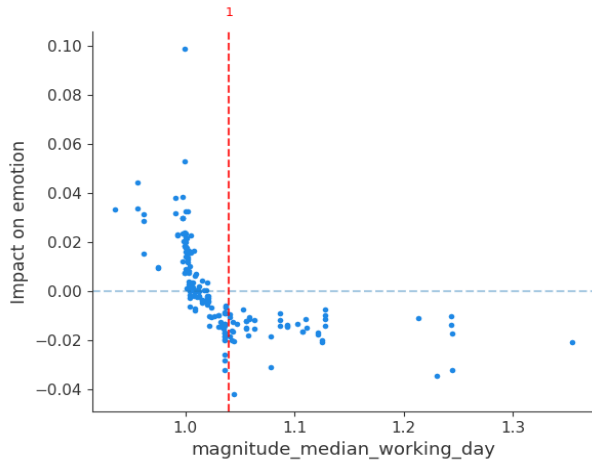

Psst: scroll down to see how your actions corresponded with your feelings!

Over the last few weeks...

Happiness

When the typical activity you did was similar to or less than mild activity (which includes walking and jogging) during the daytime, you were more happy.

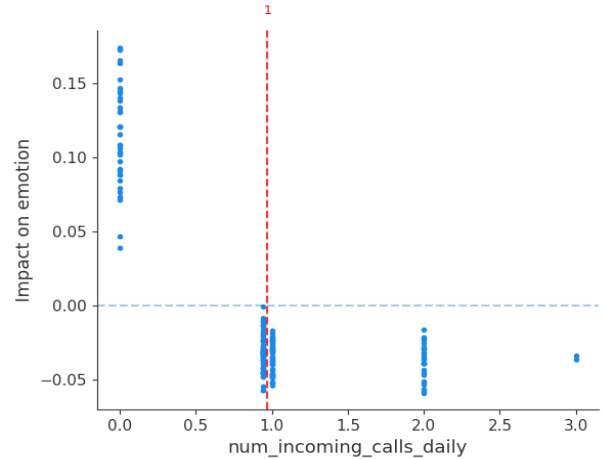

Also...

1. When you were more happy, you called for less time
2. When you were more happy, you received fewer phone calls

Sadness

When you received fewer than 1 calls in a day, you were more sad.

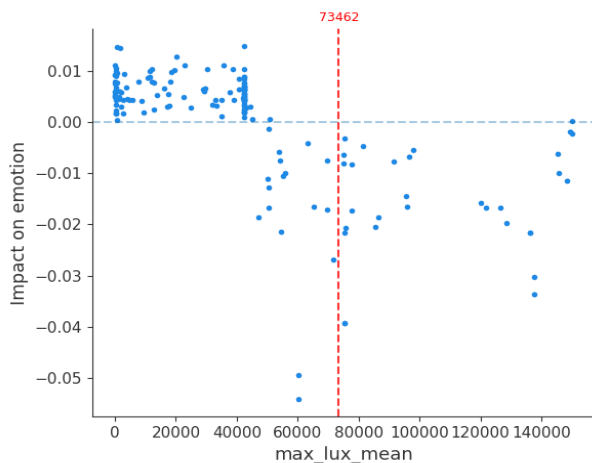

Also...

1. When you were more sad, you traveled less
2. When you were more sad, you did more low types of activity

Calm

When the brightest light around you was less than direct sunlight, you were more calm.

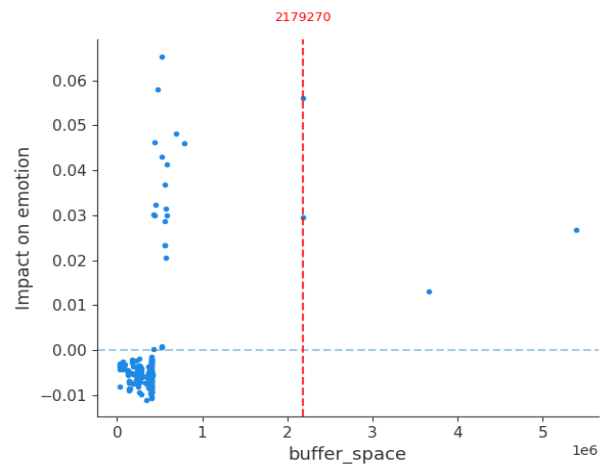

Also...

1. When you were more calm, you spent less time on music apps (this may include apps like Spotify and Youtube Music)
2. When you were more calm, you spent less time on any apps on your phone

Anxious

When the area that you covered while traveling was less than the campus of the University of Colorado, Boulder, you were less anxious.

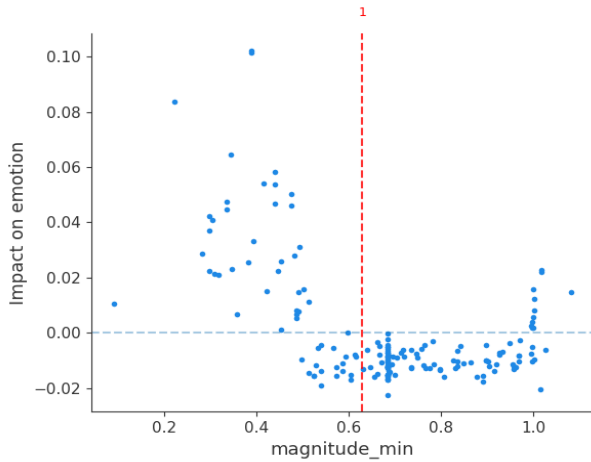

Also...

1. When you were less anxious, you spent less time on news apps (this may include apps like Reddit, NPR, and X) daily
2. When you were less anxious, you spent less time on photo and video apps (this may include apps like Instagram, Snapchat, and Youtube) daily

Over the last few weeks...

Social

When the lowest activity you did was similar to or more than mild activity (which includes walking and jogging), you were less social.

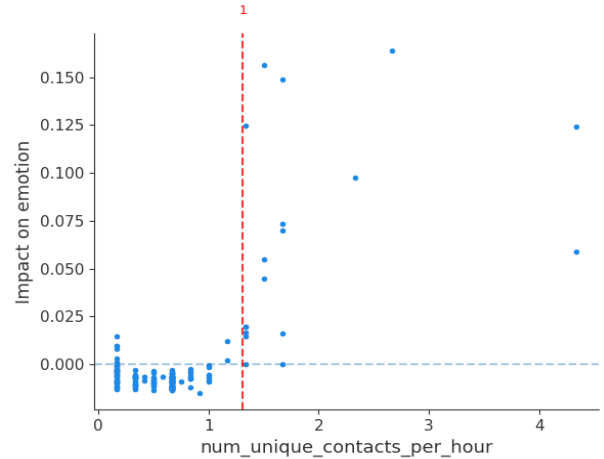

Also...

1. When you were less social, you received fewer text messages
2. When you were less social, you unlocked your phone more

Irritated

When you were messaging fewer than 1 different people, you were less irritated.

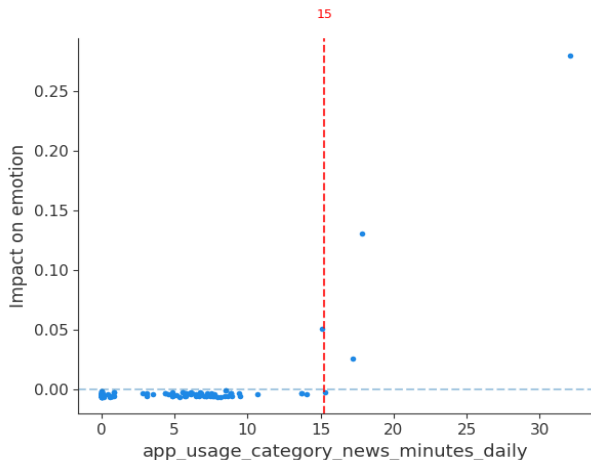

Also...

1. When you were less irritated, you spent less time on photo and video apps (this may include apps like Instagram, Snapchat, and Youtube) daily
2. When you were less irritated, you had less typical amount of light for you

Bored

When you used news apps (this may include apps like Reddit, NPR, and X) for less than 15 minutes in a day, you were less bored.

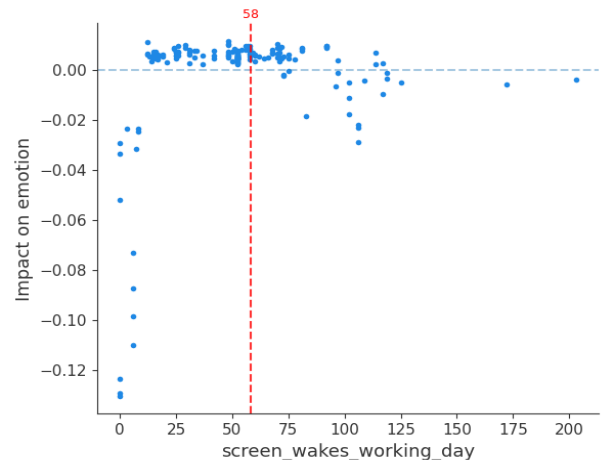

Also...

1. When you were less bored, your phone screen was awake (includes checking the time, receiving notifications) less times
2. When you were less bored, you had less bright amount of light around you

Motivated

When your phone screen was awake (includes checking the time, receiving notifications) less than 58 times during the day, you were less motivated.

Also...

1. When you were less motivated, you did less low types of activity during the daytime
2. When you were less motivated, you spent less time on social networking apps (this may include apps like Facebook, Discord, Threads, and BeReal) daily
