Welcome to your Insights!

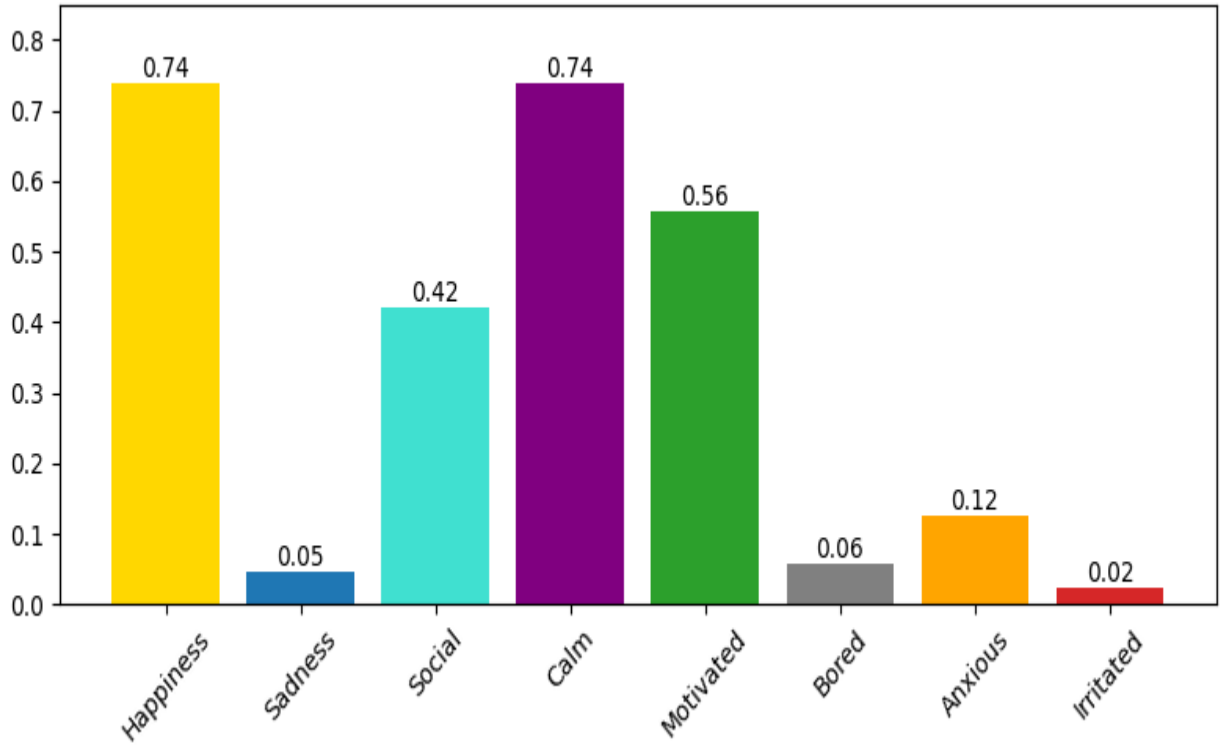

Below you will find insights and trends related to your behavior and reported emotions over the course of the study. Please review with your clinician in your next session.

The number at the top of each bar is the average score of an emotion you felt over the course of the study, ranging from 0 (no emotion) to 3 (greatest amount)!

The taller the bar is, the more you felt that emotion over the last few weeks!

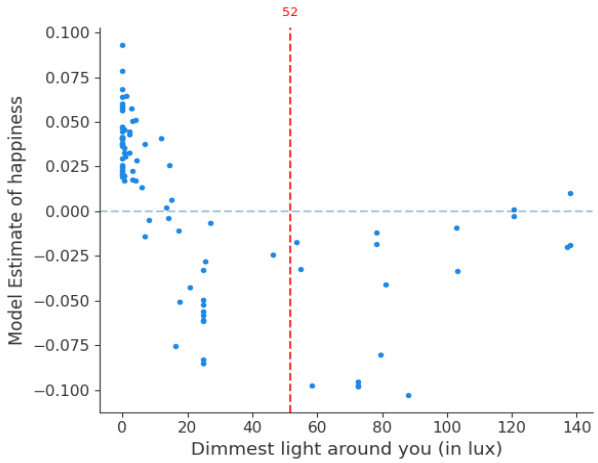

Psst: scroll down to see how your actions corresponded with your feelings!

Over the last few weeks...

Happiness

When the dimmest light around you was dimmer than a dark overcast day, you were more happy.

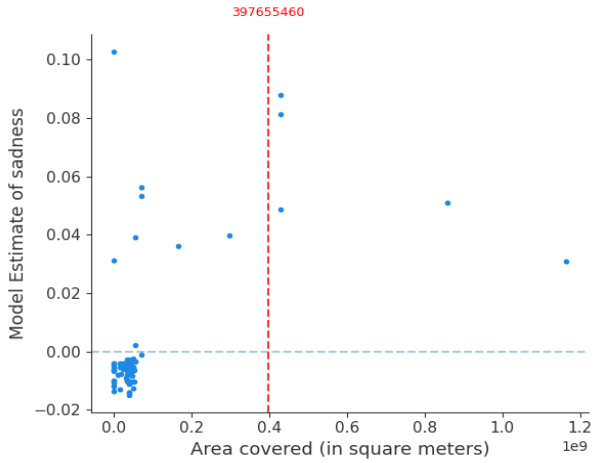

Also...

1. When you were on calls for less time, you were more happy.
2. When you traveled shorter distances, you were more happy.

Sadness

When the area that you traveled was less than the city of Denver, you were less sad.

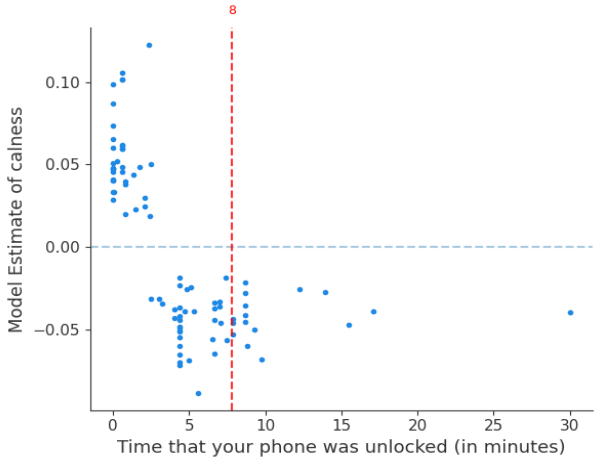

Also...

1. When your slowest movement was slower, you were less sad.
2. When you were moving less, you were less sad.

Calm

When you unlocked your phone for less than 8 minutes, you were more calm.

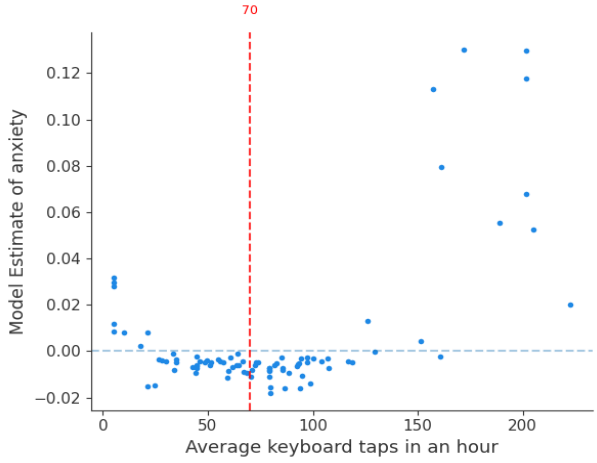

Also...

1. When the dimmest light around you was dimmer, you were more calm.
2. When you tapped your phone keyboard more times, on average, you were more calm.

Anxious

When you tapped your keyboard, on average, more than 70 times in an hour, you were more anxious.

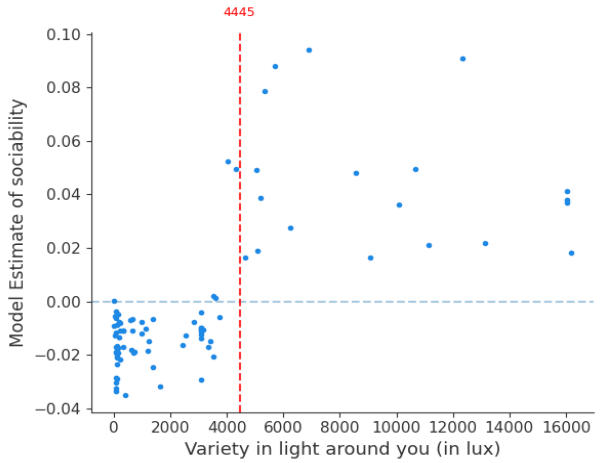

Also...

1. When you tapped your phone keyboard fewer times, you were more anxious.
2. When your phone screen was awake (includes checking the time, receiving notifications) more times during the day, you were more anxious.

Over the last few weeks...

Social

When the light around you changed more, you were less social.

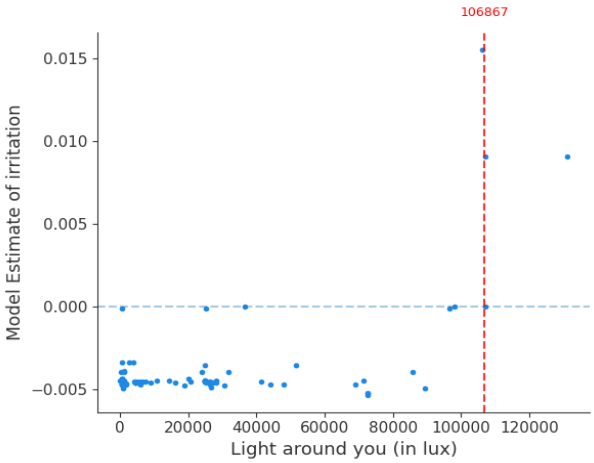

Also...

1. When you had dimmer light around you, you were less social.
2. When your movements were less varied, you were less social.

Irritated
