Welcome to your Insights!

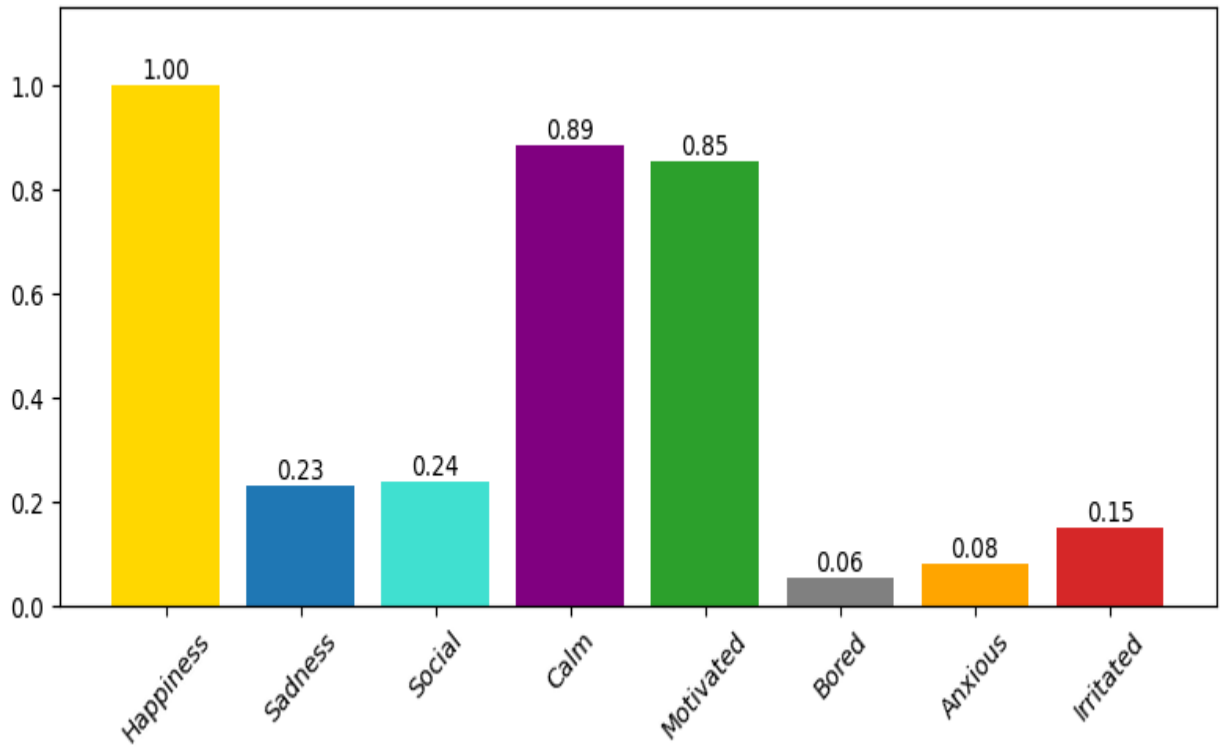

Below you will find insights and trends related to your behavior and reported emotions over the course of the study. Please review with your clinician in your next session.

The number at the top of each bar is the average score of an emotion you felt over the course of the study, ranging from 0 (no emotion) to 3 (greatest amount)!

The taller the bar is, the more you felt that emotion over the last few weeks!

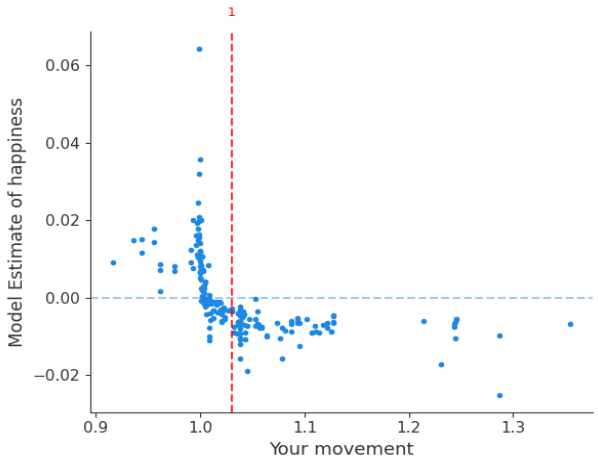

Psst: scroll down to see how your actions corresponded with your feelings!

Over the last few weeks...

Happiness

When your movement during the day was slower than walking, you were more happy.

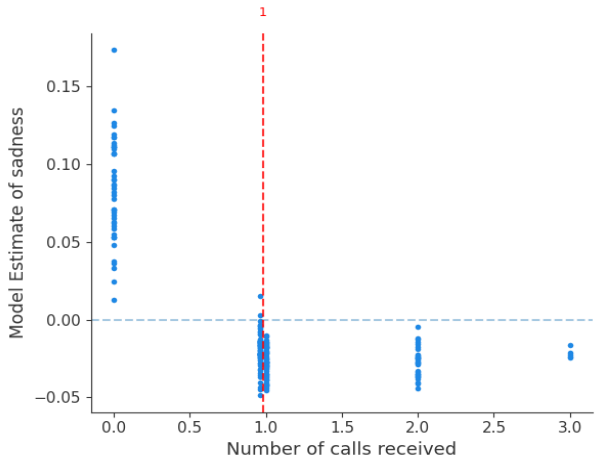

Also...

1. When you were sleeping less, you were more happy.

Sadness

When you received fewer than 1 call in a day, you were more sad.

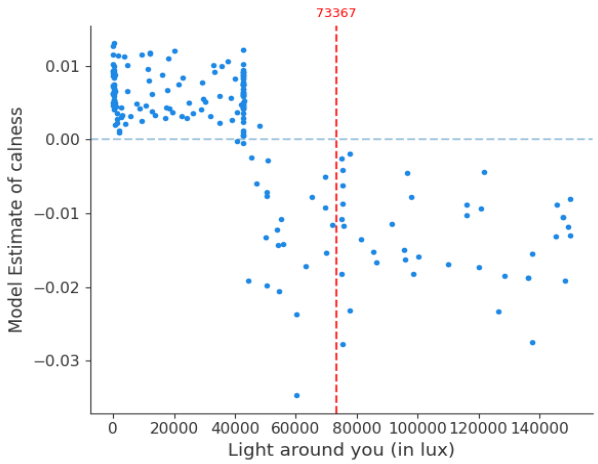

Also...

1. When you traveled shorter distances, you were more sad.
2. When you were sleeping less, you were more sad.

Calm

When the light around you was dimmer than direct sunlight, you were more calm.

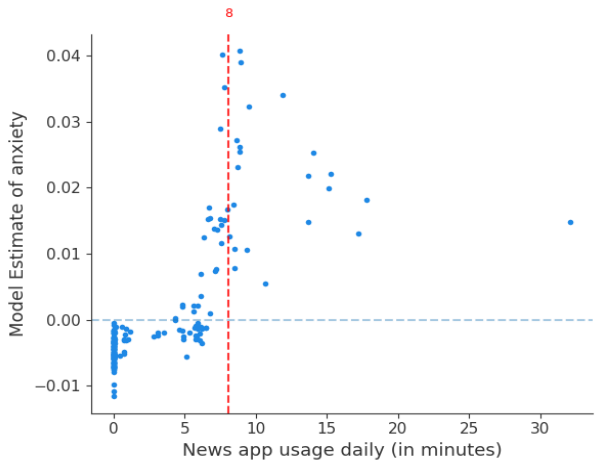

Also...

1. When you traveled shorter distances, you were more calm.
2. When the dimmest light around you was dimmer, you were more calm.

Anxious

When you used news apps (apps like Reddit, NPR, and X) for less than 8 minutes in a day, you were less anxious.

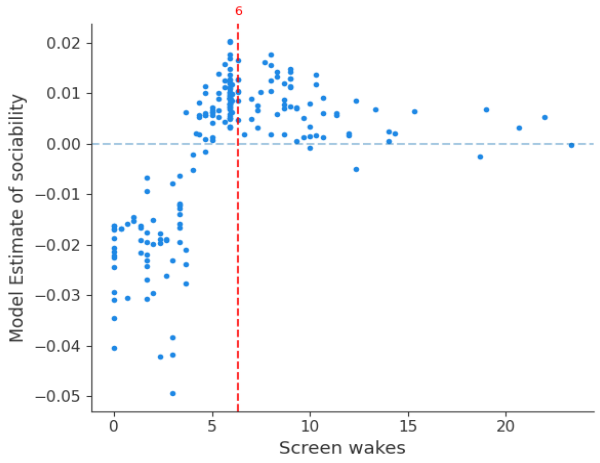

Also...

1. When you spent less time on health and fitness apps (apps like Calm and Planet Fitness) daily, you were less anxious.
2. When you traveled shorter distances, you were less anxious.

Over the last few weeks...

Social

When your phone screen was awake (includes checking the time, receiving notifications) less than 6 times, you were less social.

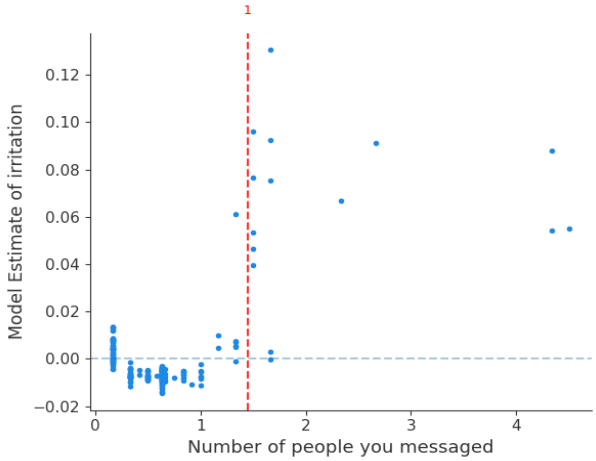

Also...

1. When you spent less time on photo and video apps (apps like Instagram, Snapchat, and Youtube), you were less social.
2. When you received fewer text messages, you were less social.
