Welcome to your Insights!

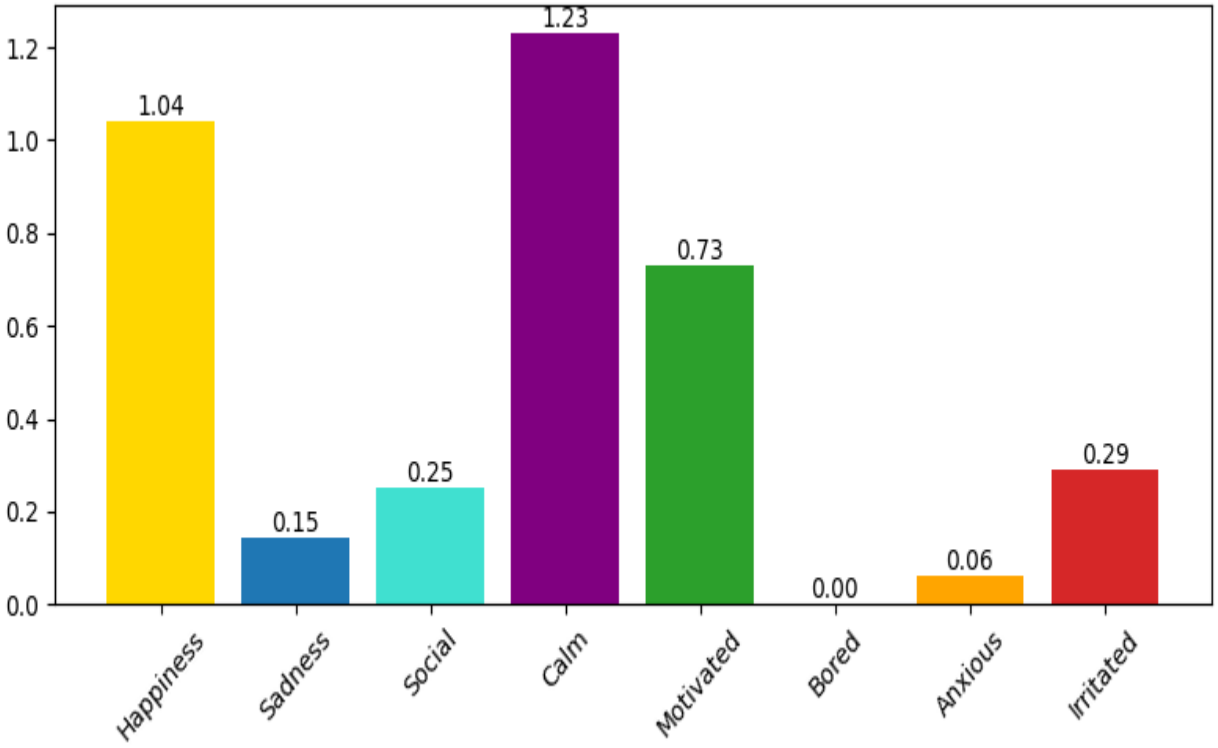

Below you will find insights and trends related to your behavior and reported emotions over the course of the study. Please review with your clinician in your next session.

The number at the top of each bar is the average score of an emotion you felt over the last two weeks, ranging from 0 (no emotion) to 3 (greatest amount)!

The taller the bar is, the more you felt that emotion over the last two weeks!

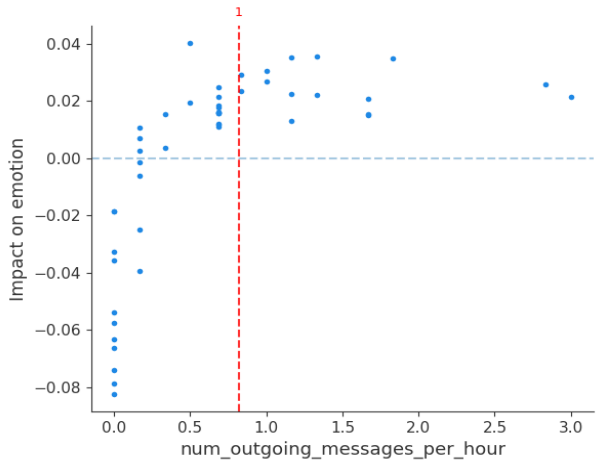

Psst: scroll down to see how your actions corresponded with your feelings!

Over the last few weeks...

Happiness

When you sent less than 1 text messages , you were less happy.

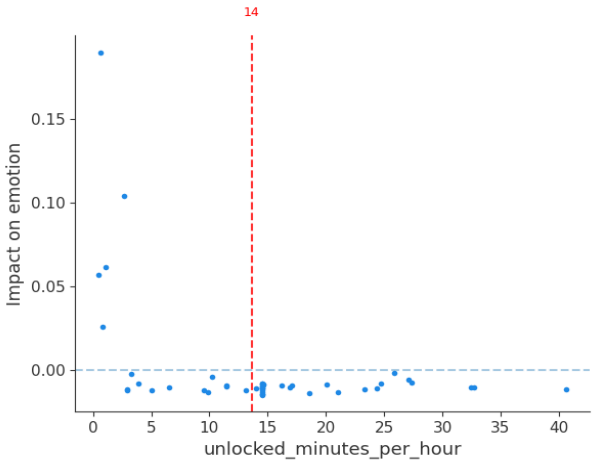

These are the top two actions associated with less happiness:

1. Less text messages you sent during a couple hours of phone usage
2. Less time you spent on utilities apps (this may include apps like Google and Chrome) in a day

Sadness

When you unlocked your phone for more than 14 minutes , you were less sad.

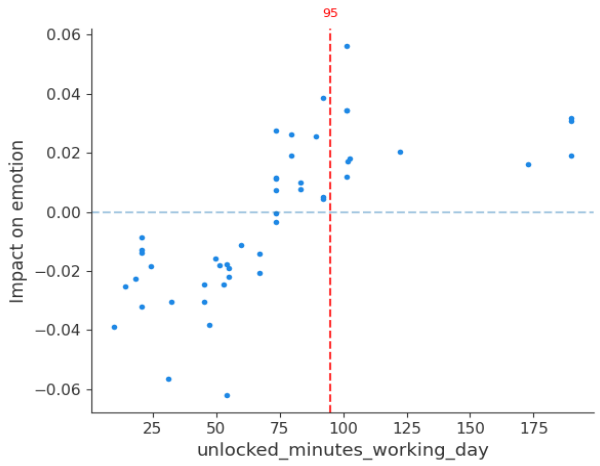

These are the top two actions associated with less sadness:

1. More time your phone was unlocked
2. Less higher activity

Social

When you unlocked your phone for less than 95 minutes during the day, you were less social.

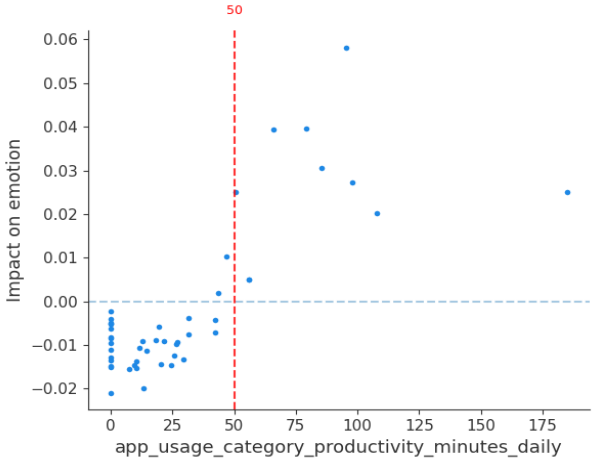

These are the top two actions associated with being less social:

1. Less time your phone was unlocked during the day
2. Less time you spent on any app on your phone in a day

Calm

When you used productivity apps (this may include apps like Gmail, ChatGPT, and Google Drive) for less than 50 minutes in a day, you were less calm.

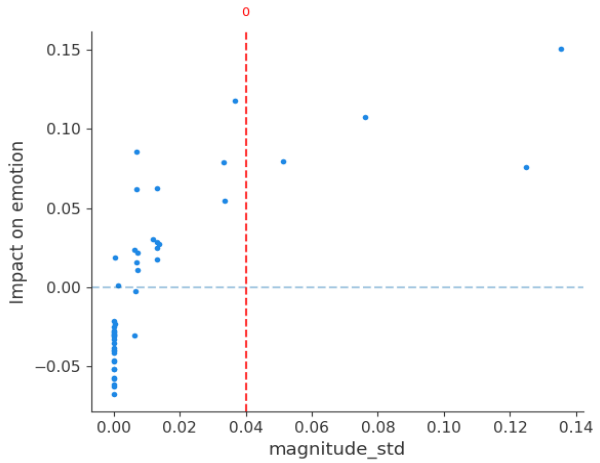

These are the top two actions associated with feeling less calm:

1. Less time you spent on productivity apps (this may include apps like Gmail, ChatGPT, and Google Drive) in a day
2. Less time you spent on any app on your phone

Over the last few weeks..

Motivated

When the variety of activities that you did was small, you were less motivated.
