Welcome to your Insights!

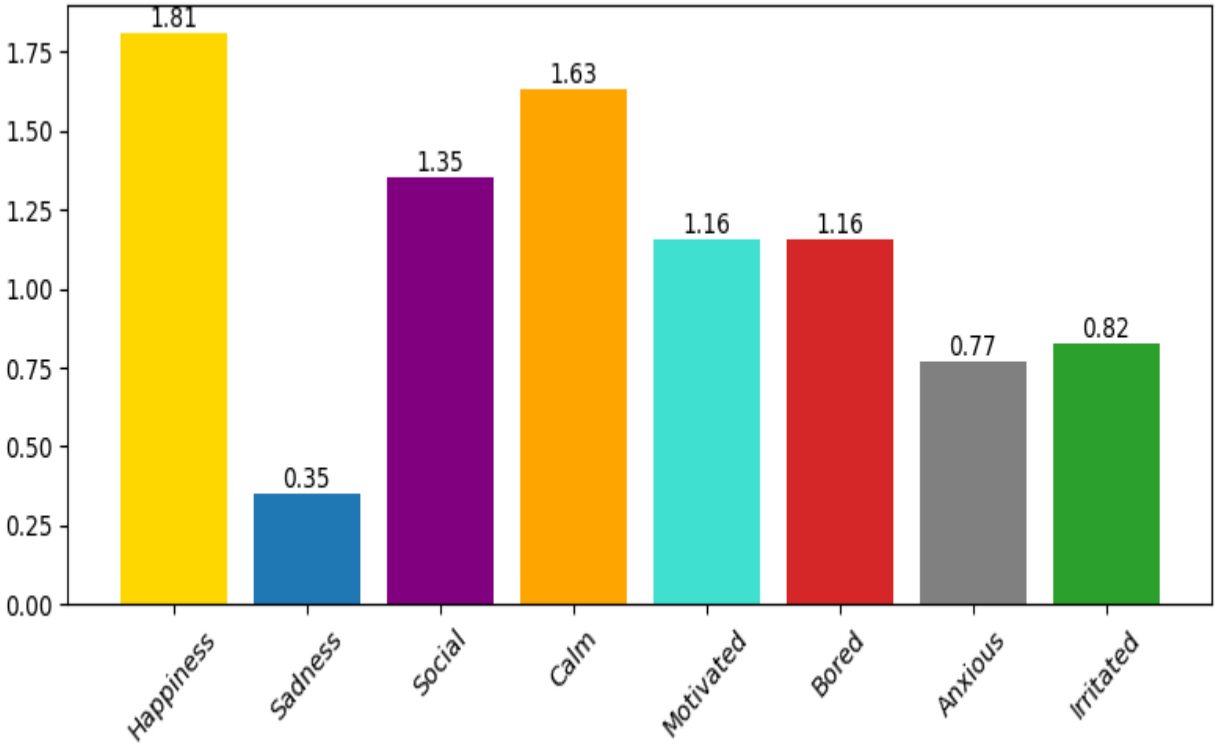

Below you will find insights and trends related to your behavior and reported emotions over the course of the study. Please review with your clinician in your next session.

The number at the top of each bar is the average score of an emotion you felt over the last two weeks, ranging from 0 (no emotion) to 3 (greatest amount)!

The taller the bar is, the more you felt that emotion over the last two weeks!

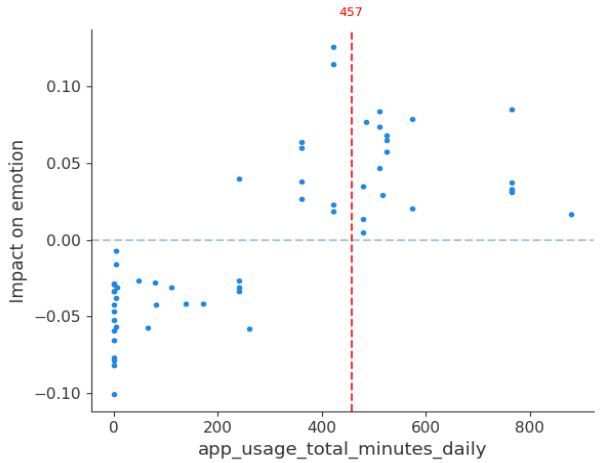

Psst: scroll down to see how your actions corresponded with your feelings!

Over the last few weeks...

Happiness

When the total time you spent on any apps was less than 457 minutes in a day, you were less happy.

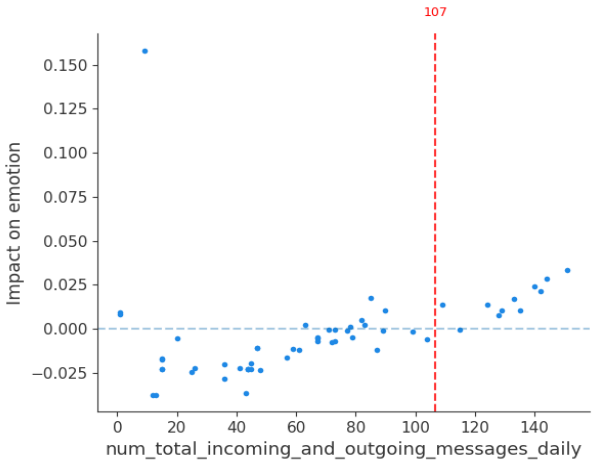

These are the top two actions associated with less happiness:

1. Less time you spent on any app on your phone in a day
2. Less text messages you sent and received in a day

Sadness

When you sent and received less than 107 text messages in a day, you were less sad.

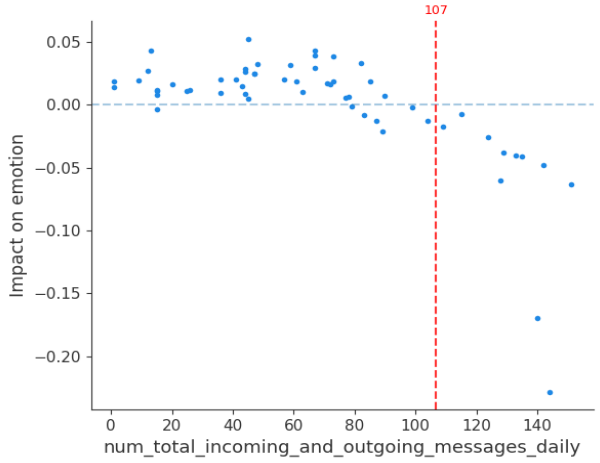

These are the top two actions associated with less sadness:

1. Less text messages you sent and received in a day
2. More lower activity

Social

When you sent and received less than 107 text messages in a day, you were more social.

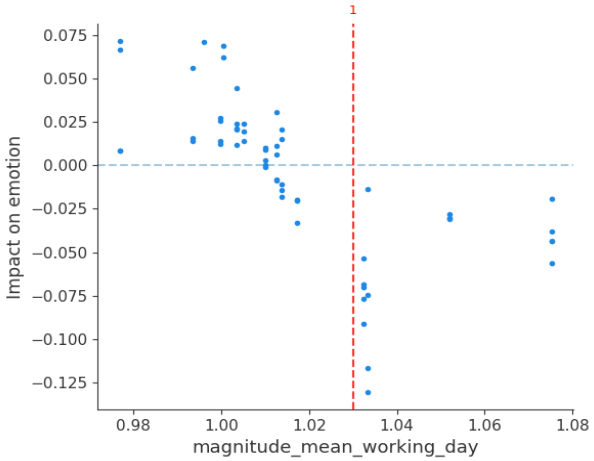

These are the top two actions associated with being more social:

1. Less text messages you sent and received in a day
2. More average activity for you during the daytime

Calm

When the average activity you did was similar to or less than mild activity (which includes walking and jogging) during the daytime, you were more calm.

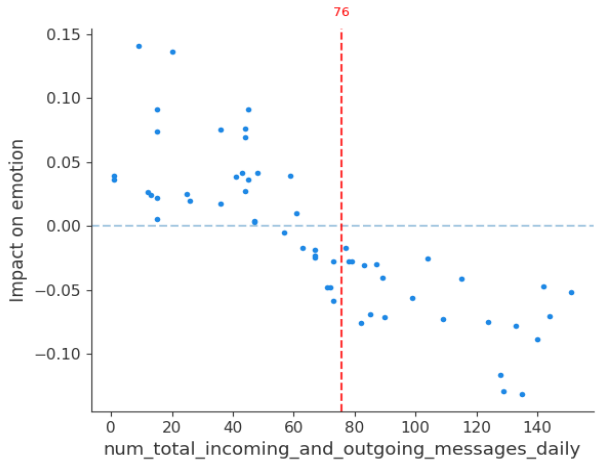

These are the top two actions associated with feeling calmer:

1. Less average activity for you during the daytime
2. More typical activity you did during the daytime

Over the last few weeks..

Motivated

When you sent and received less than 76 text messages in a day, you were more motivated.

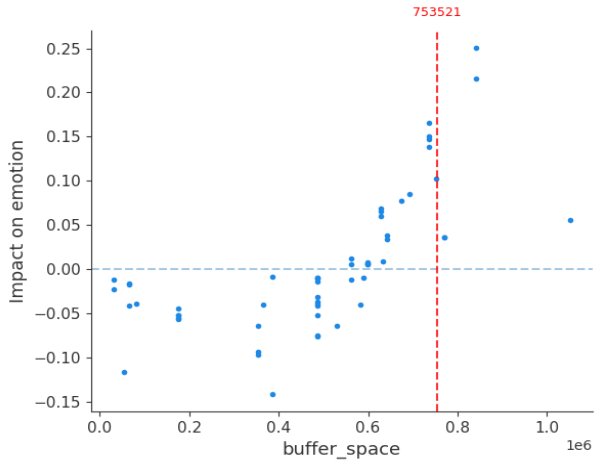

These are the top two actions associated with feeling more motivated:

1. Less text messages you sent and received in a day
2. Less average activity for you
