Welcome to your Insights!

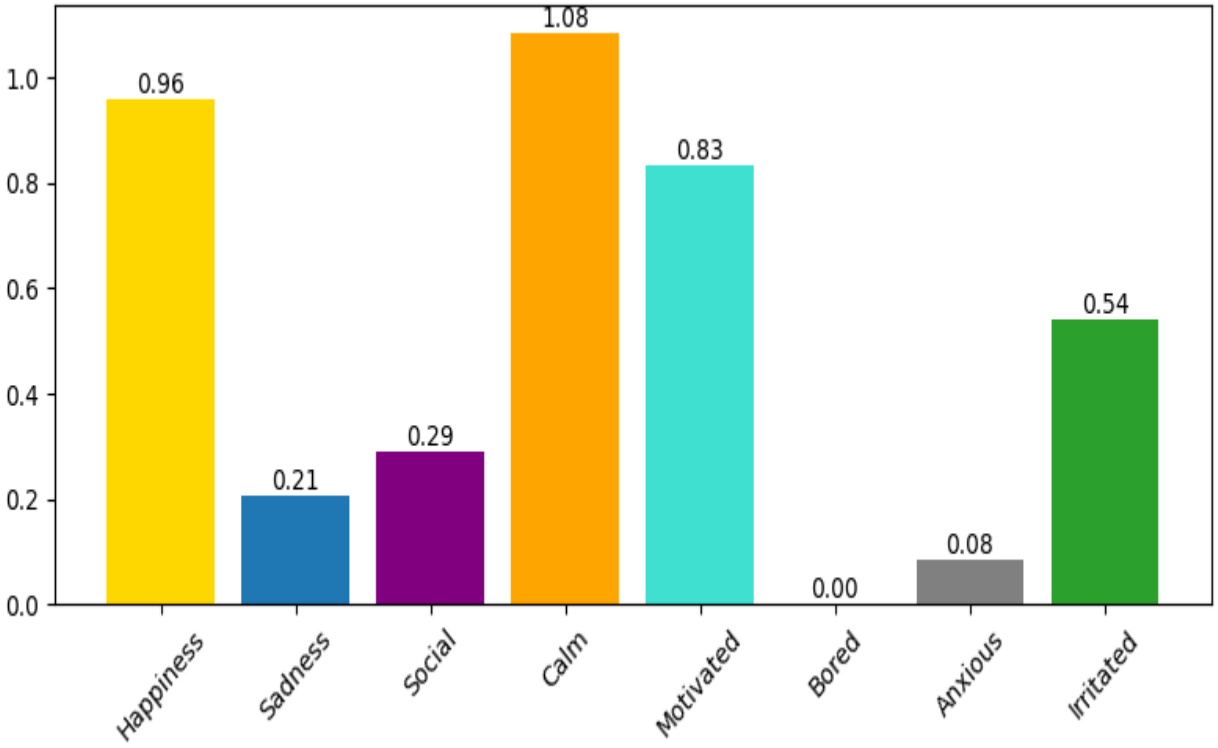

Below you will find insights and trends related to your behavior and reported emotions over the course of the study. Please review with your clinician in your next session.

The number at the top of each bar is the average score of an emotion you felt over the last two weeks, ranging from 0 (no emotion) to 3 (greatest amount)!

The taller the bar is, the more you felt that emotion over the last two weeks!

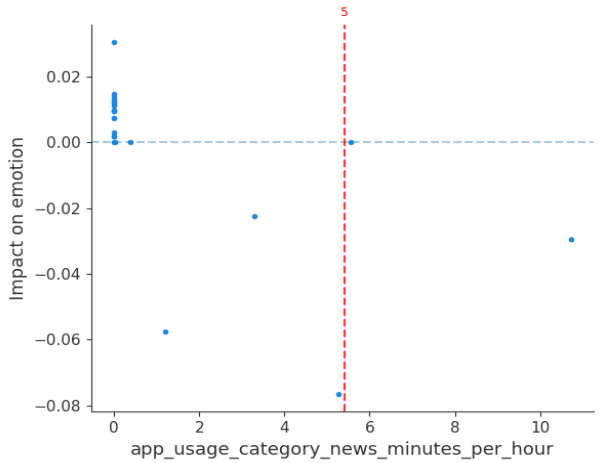

Psst: scroll down to see how your actions corresponded with your feelings!

Over the last few weeks...

Happiness

When you used news apps (this may include apps like Reddit, NPR, and X) for less than 5 minutes , you were more happy.

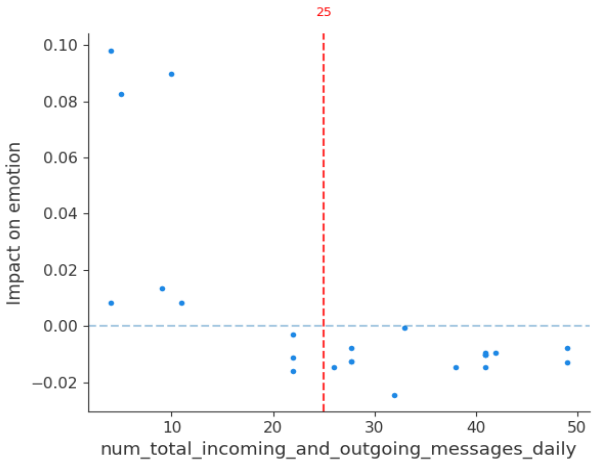

These are the top two actions associated with more happiness:

1. Less time you spent on news apps (this may include apps like Reddit, NPR, and X)

Sadness

When you sent and received more than 25 text messages in a day, you were less sad.

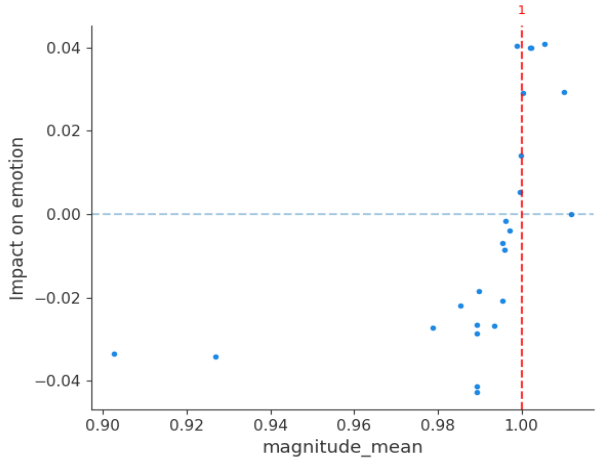

These are the top two actions associated with less sadness:

1. More text messages you sent and received in a day
2. More time your phone was unlocked during the day

Social

When the average activity you did was similar to or less than mild activity (which includes walking and jogging) , you were less social.

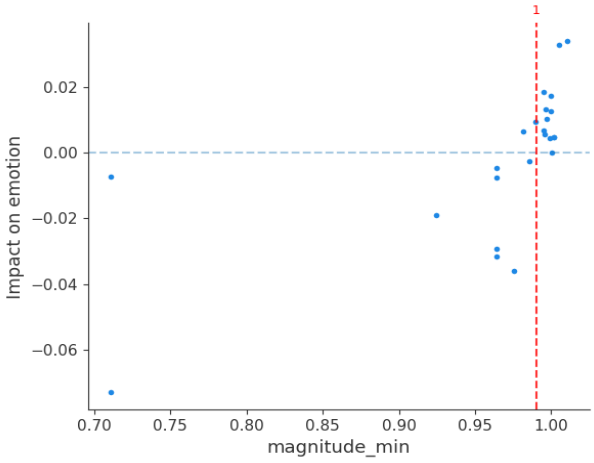

These are the top two actions associated with being less social:

1. Less average activity for you
2. Less text messages you sent during a couple hours of phone usage

Calm

When the lowest activity you did was similar to or more than mild activity (which includes walking and jogging) , you were more calm.

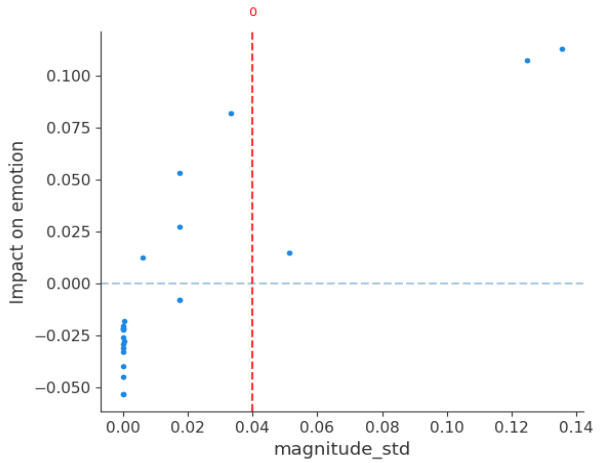

These are the top two actions associated with feeling calmer:

1. More lower activity
2. Less typical activity you have done

Over the last few weeks..

Motivated

When the variety of activities that you did was small, you were less motivated.

These are the top two actions associated with feeling less motivated:

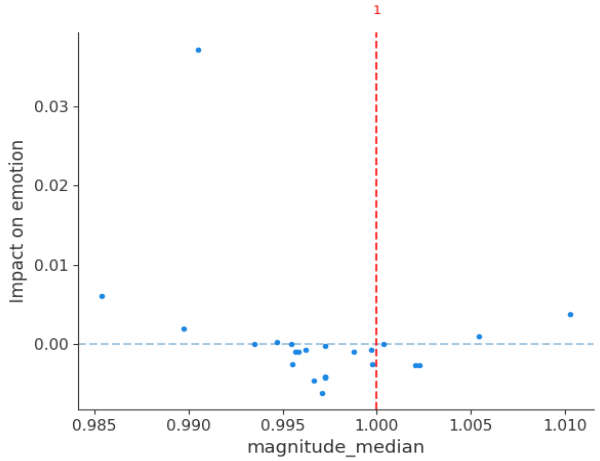

1. Less varied activity
2. More lower activity

Bored

Insufficient data collected.

Anxious

When the typical activity you did was similar to or less than mild activity (which includes walking and jogging) , you were more anxious.

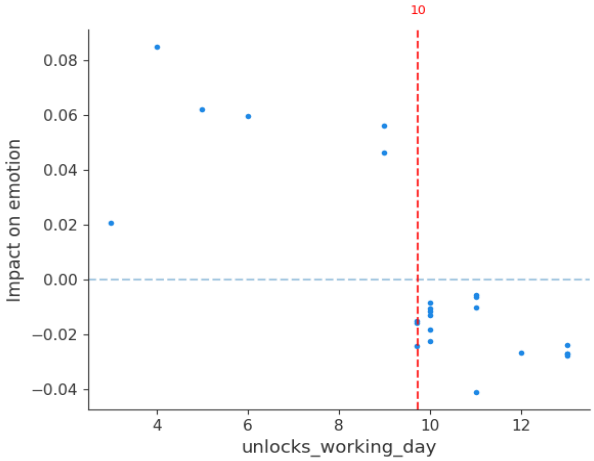

These are the top two actions associated with feeling more anxious:

1. Less typical activity you have done

Irritated

When you unlocked your phone more than 10 times during the day, you were less irritated.

These are the top two actions associated with feeling less irritated:

1. More phone unlocks during the day
2. Less time you spent on productivity apps (this may include apps like Gmail, ChatGPT, and Google Drive)
