

Welcome to your Insights!

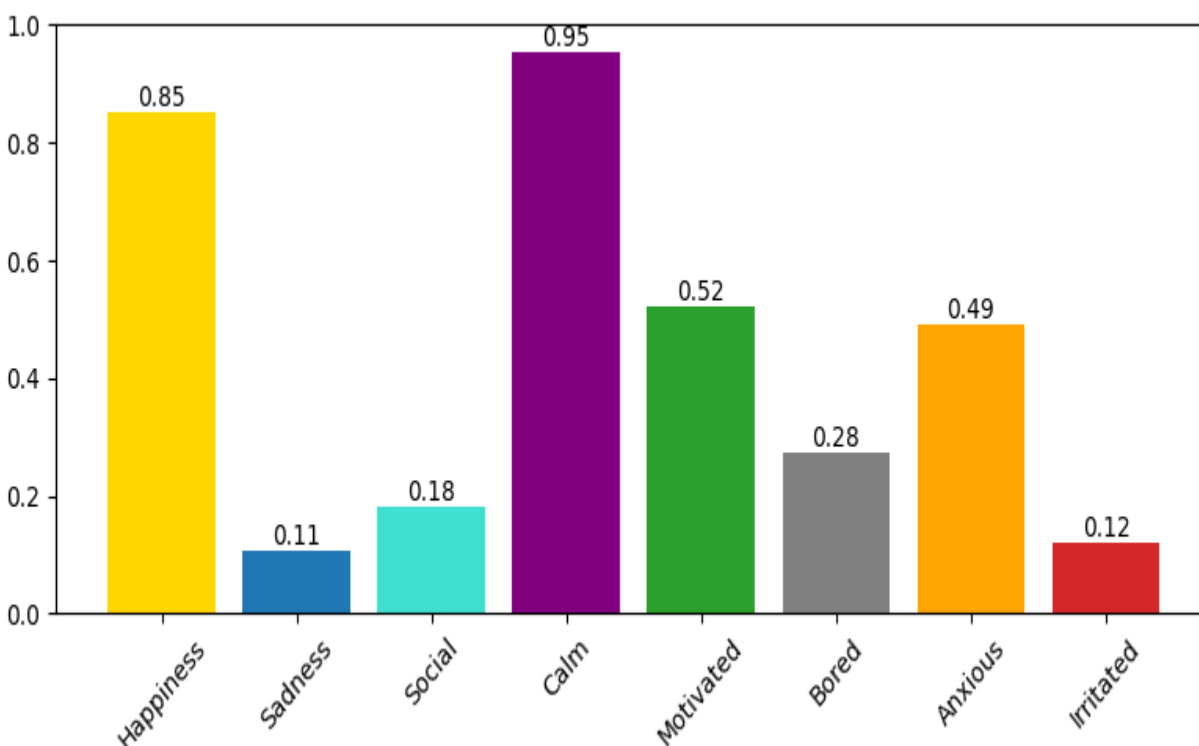

Below you will find insights and trends related to your behavior and reported emotions over the course of the study. Please review with your clinician in your next session.

The number at the top of each bar is the average score of an emotion you felt over the course of the study, ranging from 0 (no emotion) to 3 (greatest amount)!

The taller the bar is, the more you felt that emotion over the last few weeks!

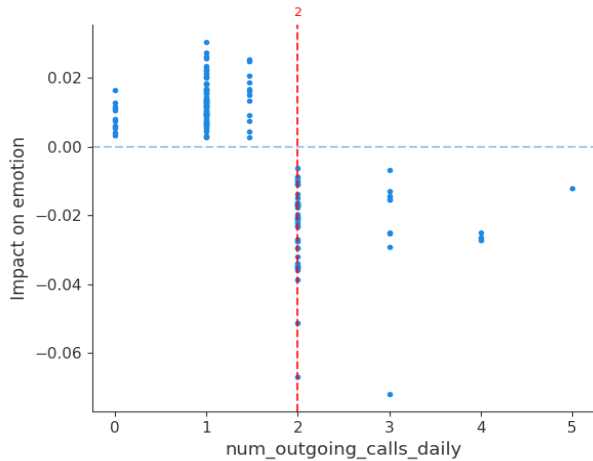

Psst: scroll down to see how your actions corresponded with your feelings!

Over the last few weeks...

Happiness

When you made fewer than 2 calls in a day, you were more happy.

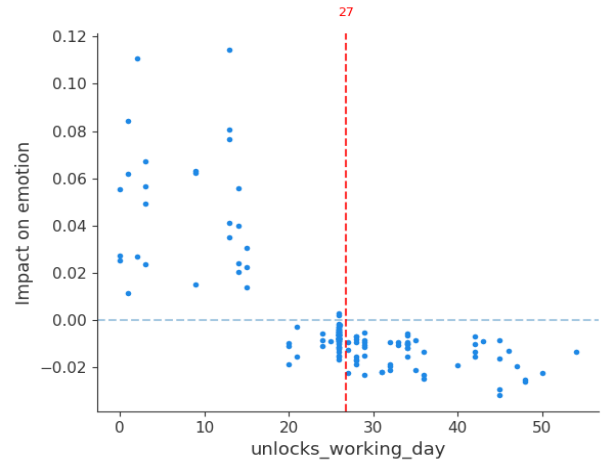

Also...

1. When you were on calls for more time, you were more happy.
2. When your movements were more varied, you were more happy.

Sadness

When you unlocked your phone less than 27 times during the day, you were more sad.

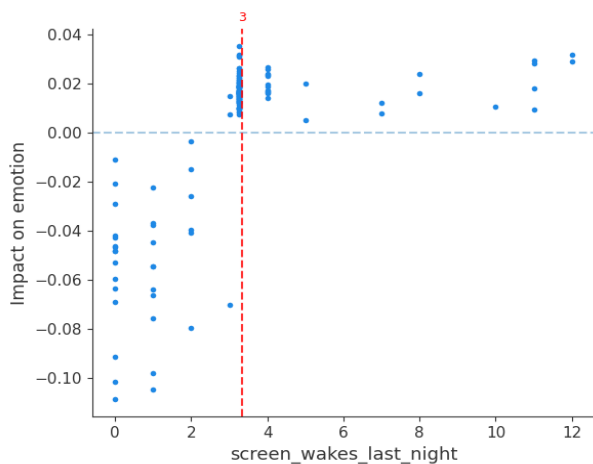

Also...

1. When you were on calls for more time, you were more sad.
2. When your phone screen was awake (includes checking the time, receiving notifications) less times, you were more sad.

Calm

When your phone screen was awake (includes checking the time, receiving notifications) less than 3 times during the night, you were less calm.

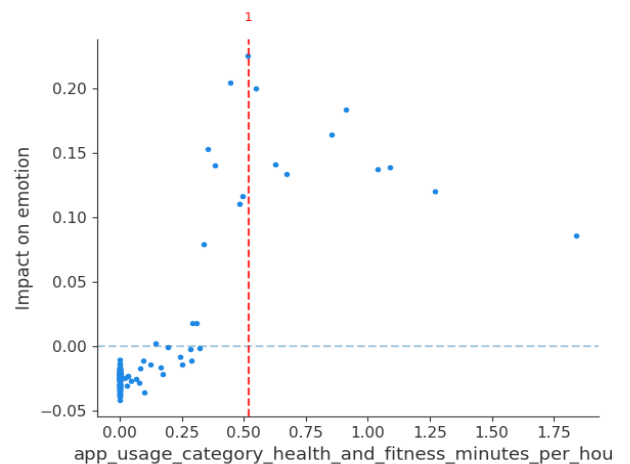

Also...

1. When you sent fewer text messages, you were less calm.
